

Pacific Software, Inc. Receives Letter of Intent from Brazil's Government of Rondonia

Pacific Software, Inc. launches initiative to enter Brazil's \$185 billion export market through its association with the Government of Rondonia and some of its commodities exporters

DANA POINT, CA – July 17, 2018 – Pacific Software, Inc. (OTC: PFSF:PK), (“Pacific Software” or the “Company”), a publicly traded emerging technology corporation positioned for investments, mergers and acquisitions of software technologies and platforms, today announced that it received a letter of intent from Brazil's [Government of Rondonia](#) dated May 25, 2018 to assist, coordinate, organize and promote trade between Brazil's commodities exporters and China's importers. The company's effort will be facilitated by the design and launch of its B2B/B2C trade portal and its Agri-Blockchain technology solutions for the export supply chains and logistics sectors. According to the World Bank, Brazil's exports exceeded \$185 billion in 2016, agriculture and meats made up approximately \$70 billion of total exports.

[Pacific Software Inc.](#) aims to become the dominant player in supply chain and logistics solutions in Brazil through its proprietary state-of-the-art blockchain technology trade portal now under design with KB Quest and its collaboration with IBM's Hyperledger Blockchain Infrastructure Backend as a Solution (BaaS). The Company may lead a trade delegation with a possible visit to China in the near future to further discuss trade relations between Brazilian exporters and Chinese importers with the emphasis on agricultural products such as beef, pork and soy beans in collaboration with the Government of Rondonia in Brazil.

The launch of its B2B and B2C E-commerce platform which may be built on IBM's blockchain software could feature multi-level, multi-channel trade portal capabilities available in Cantonese, English, Portuguese and Mandarin. The platform is designed to empower users to track the provenance of products from producers to exporters to buyers, assuring audit-trails and a transparent chain of custody. The portal could issue and validate certifications for all participants in addition to conducting audits of certificates, aiding exporters, importers, distributors and food exchanges for consumers. In addition, the Company may utilize the IBM Hyperledger Blockchain platform for automated billing and invoicing, digitalizing processes and documents while reducing the vulnerabilities and inaccuracies of the current paper-based system.

“We are excited to collaborate with the Government of Rondonia to promote Brazilian exports to China and enter strategic alliances with some of Brazil's agriculture and meat exporters to help implement our disruptive blockchain technology-based B2B platform for the supply chain and logistics sectors,” said Pacific Software, Inc.'s President Peter Pizzino. “The

recent trip to Brazil has strengthened relations for building regional market share to become the major blockchain company there.”

About Pacific Software Inc.

Pacific Software, Inc. (OTC: PFSF) is an emerging development technology corporation positioned for investments, mergers and acquisitions of software technologies and platforms. The Company is a designer, developer and commercial distributor of blockchain-based systems. The Company intends to be uniquely positioned to deliver B2B and B2C blockchain solutions by utilizing IBM’s Hyperledger Blockchain “Backend as a Service” (BaaS) Infrastructure for three key industries: Agriculture, to target farm-to-table beef exports; Cannabis, to improve Seed-to-Sale supply chain management and traceability; and Opioids/Controlled Substance Management, to create a verifiable and trusted ledger between pharmaceutical manufacturers and consumers.
