Purchasing NATV tokens involve high degrees of risk.

NATIVE BLOCKCHAIN TOKENS (NATV)

WHITEPAPER

By: NativeBlockchain.Org

Native Blockchain Tokens or NATV is a cryptocurrency token developed to provide an international blockchain solution that benefits the freelance industry.

The NATV token provides token holders the rights to;

- Access international freelance jobs without commissions
- Advertise and promote freelance services to a global job marketplace
- Hire freelancers using NATV tokens
- Accept international payments using NATV tokens
- Send and transfer international escrow payments immediately without delay of payment.
- Exchange NATV tokens into payments in local currencies with direct deposit to a bank account or through a local cash pickup.
- Access and purchase international products and services

There are currently over 53 million people in the United States earning income as freelancers contributing over \$715 Billion in freelance earnings. It is predicted that by 2020, more Americans will be earning income as freelancers than those who are not.

Other countries are seeing even faster growth. India for example has 15 Million freelancers, mostly working as technical professionals serving an online audience, however with over 1 Billion people and over 375 Million internet users, the India freelance community is expected to grow to over 100 Million Freelancers within the next 10 years. Several countries are leading the freelance revolution with the highest demand of workers coming from the United States, India, Philippines, Ukraine, Pakistan, Russia, Bangladesh, Canada, United Kingdom, & China.

We believe that the Native Token network can significantly help connect employers with freelance professionals from across the world while allowing freelancers to save money on commissions and receive international payment through a fast, secure, and affordable blockchain.

Our Mission

The freelance industry is booming. From every corner of the globe, more and more individuals are earning income and financial freedom as freelance workers. Whether it's providing skilled tasks, developing software, writing articles, designing logos or websites, businesses are learning the incredible benefits of hiring and outsourcing professional jobs to freelancers.

We are developing Native Blockchain Tokens (NATV) to be a smart network that utilizes the NATV token to provide rights of access to the professional and freelance services industries while providing the necessary network utilities that enable NATV token holders the rights to sell products and services, contribute labor, and obtain access to freelance jobs through our affiliated networks.

The Problem

With all of this growth in the freelance industry, and millions and millions of freelancers earning income online there continues to be many challenges that we desire to solve. For starters, most freelance marketplaces charge incredibly high commissions which take 20% or more of all earnings from freelancers. Another 3% is generally charged to employers for processing their payments and holding escrow. Most importantly, it is very difficult and costly for freelancers to accept and withdraw funds which can take weeks or months to get access to their money which negatively impacts their daily lives, their work, and ultimately their relationship with the employer.

Native Blockchain Solutions & Products

Freelance and Employment services using NATV Tokens: A simple to use network utility for the freelance community that provides useful tools to freelancers, professionals, and businesses using Native Blockchain Tokens (NATV).

- We will be providing an open network for the freelance community to earn income and grow their portfolio while avoiding commissions and other expenses.
- We will provide employers a simple and affordable solution to finding and hiring top talent from across the globe.
- We will provide a simple solution to hold and transfer escrow payments for freelance work securely using NATV tokens whether the job is hired through our affiliate networks including gigb2b.com or any other freelance platform.
- We will simplify and speed up the process of withdrawing funds for freelance projects. Instead of waiting for 14 days or more to withdraw their funds, NATV token holders will receive funds instantly once the project is completed or approved by the employer.
- Freelancers who receive payment for a job using NATV tokens through our network can exchange those NATV tokens into a payment in their local currency through a direct deposit to their bank or local cash pickup. This service is available in multiple countries including India, Pakistan, Philippines, United States, Canada, Ukraine, & South Korea, with more to be added later)
- We will build and offer additional products and services that provide utility benefits for the freelance and business to business community using NATV tokens.

Exchanging NATV into local currencies

- Freelancers who receive payment for a job using NATV tokens through our network can exchange those NATV tokens into a payment in their local currency through a direct deposit to their bank or local cash pickup. This service is available in multiple countries including India, Pakistan, Philippines, United States, Canada, Ukraine, & South Korea, with more to be added later)

Trading NATV on exchanges

- NATV token holders will be able to trade their NATV tokens on third party cryptocurrency exchanges. Although we cannot provide any form of service or price guarantee as to the value of NATV tokens on these exchanges, we will provide a list of these exchanges on our website from time to time.

Network Rights and Utility Use of NATV Tokens

The purpose of the NATV Token is to;

- Provide the rights to token holders to access the Native Token network and affiliated freelance communities including the gigb2b.com freelance network.
- Provide the rights to token holders to sell products and services through the Native Token network and affiliated freelance communities.
- Provide the rights to token holders to use the Native Token network and affiliated freelance communities to advertise freelance jobs, advertise freelance or professional services, bid on freelance jobs, award freelance jobs, purchase or sell related services, and contribute labor through the network.
- Provide the rights to token holders to gain access to freelance employment opportunities.
- Provide the rights to token holders to manage and release international escrow payments.
- Provide employers and businesses a simple and affordable means of accessing top international talent and freelance networks using Native Tokens.
- Provide employers and freelancers regardless of the hiring marketplace a simple and secure utility for managing and releasing escrow payments through Natives network using Native tokens through secure blockchain technology.
- Provide access to professional website hosting services that use the Native Token network utilities and (NATV) tokens.
- Provide access to freelancers and businesses to earn NATV tokens for providing labor and services through the gigb2b.com and Native Token network.
- Develop future products and services that provide professional utilities to the freelance and business to business communities through the Native Token network.

Our Product History

We developed and launched Gigb2b.com as a basic freelance community in January 2017. When we launched, we initially offered an in-house version of digital coins that were mainly used as an experiment to see how our members would interact with it. This was not built on block chain technology but was instead used as a digital coin. Each digital coin was required to bid or pay commissions for awarded projects and we allowed our members to resell their coins to other users. Our members quickly began earning, collecting, transferring, and selling the coins to other members and we realized our basic version wouldn't meet our long-term goals or the goals of our members. Through discussions with our members, we realized we needed to develop a blockchain technology solution to better serve the freelance community.

In April 2017, we ended our basic digital coin and enabled a pay as you go similar to other freelance websites with the idea that we would focus on building a reliable token that could provide a more efficient service to our members. In hindsight, we probably should of just left the digital coin active while we developed the cryptocurrency because we quickly realized through customer feedback how much our members enjoyed earning and collecting our digital coins. But in all reality, we needed to develop Native Currency from the ground up that will provide a more secure network and utility that will benefit all our members.

We have proven through our growing freelance community that our existing members will use digital coins or tokens as well as buy and sell them with each other. The goal is to grow our community so that each member embraces the benefits from both the freelance revolution and the Native Token eco-system.

Gigb2b Usage Pricing using NATV tokens:

Following the token sale, NATV tokens will be used to gain access and utilize the current and future utilities of the gigb2b freelance community. NATV token holders will also be able to use the Native Token network for managing escrow payments regardless of the hiring platform used. The gigb2b usage pricing may change at any time.

	October Pricing:
Create a freelance profile	No Fee
Advertising Part Time Freelance Jobs	No Fee
Commission rate for awarded Job	25 NATV Tokens
Unlimited Bidding Membership	100 NATV Tokens per year
Premium Advertising Membership	100 NATV Tokens per year
Skill Matchmaking	25 NATV Tokens
Advertise Full Time Job	25 NATV Tokens
Accept NATV as payment	No Fee
Exchange NATV into local currency	No Fee

Native Token Sale (NATV)

We have already developed gigb2b.com as a basic freelance community, we believe the global freelance community is starved for an affordable solution that can help connect employers and freelancers through a community driven network that is more affordable to use, provides beneficial utilities, and offers a simple international escrow payment platform for employers and freelancers.

- Our initial member invite Token Sale will begin on September 4th, 2017 and end on or before October 3rd, 2017.
- Participating in the Token Sale is available through Ethereum (ETH).
- We will issue a maximum of 30,000,000 non-mineable Tokens. Our token supply will be distributed as follows;
 - 1 ETH for 11,000 Native Currency Tokens (NATV)
- Unsold tokens: We will begin distributing all non-reserved NATV tokens shortly after our token sale through individual freelancer member claims on the gigb2b network. Any registered freelancer of the gigb2b community can claim up to 25 NATV tokens for joining the gigb2b network, for completing specific job tasks through the community, for accepting Native tokens as payment, and for being awarded freelance jobs on any of the top freelance networks. Freelancers are required to claim their initial NATV tokens through gigb2b.com using an ERC-20 wallet within 30 days of joining or their rights to claim their free 25 NATV for joining gigb2b are cancelled and the 25 NATV tokens reserved for them will be distributed by Native Currency LLC through third party exchanges. All NATV distributions to freelancers will last until 75% of all NATV is distributed on the blockchain. The remaining 25% of NATV will be held by Native Currency, LLC for future corporate uses. Any Distribution for unclaimed tokens through third party exchanges by Native Currency LLC will be used for general corporate purposes including marketing and developing the network. Although we believe this distribution model will successfully grow the international community of NATV users along with establishing a fair price per NATV token, there is no guarantee that this form of distribution will not negatively impact the current or future value of our tokens.
- We have reserved 5% of our tokens or 1,500,000 NATV to be issued to our affiliated developer GIGB2B, INC to be used towards future development and access to their network. In doing so, GIGB2B, INC may sell these tokens through future cryptocurrency exchanges which may negatively impact the value of our tokens.
- The fastest and safest way to receive your Native Currency (NATV) tokens is to purchase them using Ether through MyEtherWallet.com or Mist. In doing so, Your NATV Tokens will be automatically linked to your MyEtherwallet.

- The funds raised from the token sale and any future sale will be used for continued development of our network, utilities, and affiliate partnerships.
- We have developed the NATV token using the Ethereum blockchain. NATV is an ERC20 Token which provides a reliable, smart, and secure platform for distribution. This is an open, verifiable, and automated system for delivering our tokens and we believe it's more important that we use our resources to grow the Native Token network which will benefit all NATV token holders rather than spend time trying to develop the next cool blockchain.
- We expect NATV tokens will be tradable on several cryptocurrency exchanges following the Token Sale. In addition, Gigb2b.com will begin accepting NATV tokens for access to their network and services beginning on October 4th, 2017.

Purchasing NATV Tokens

The NATV Token Sale starts on September 4th, 2017 at 00:00 UTC. The sale will continue until October 3rd, 2017 at 00:00 UTC. The maximum total amount of NATV Tokens available in the Token Sale is 30,000,000 NATV.

NATV Tokens can be purchased with ETH using MyEtherWallet.com. No additional NATV tokens will ever be issued.

Future purchases of NATV tokens will be required through existing holders or third party exchanges.

Ownership Rights & Using Tokens

Each NATV Token represents the right to use and access the Native Token and Gigb2b.com Networks and any affiliated complimentary network and utility.

NATV Tokens will be used and required through the gigb2b community for;

- Bidding on freelance jobs
- Paying commission for awarded jobs
- Paying commissions for gigs or services sold through network
- Sending or withdrawing funds
- Paying for website hosting services
- Future products and services launched through the gigb2b community

NATV Tokens will be used on the Native Token network for;

- Managing escrow payments from any freelance community
- Sending or receiving escrow payments for any freelance community
- Sending or receiving payments for any service that requires an online payment and can benefit from a fast and secure payment platform with low cost transaction fees
- Accessing affiliated networks, utilities, and services using NATV tokens
- Accessing promotional deals, products, and services

Ownership Access Rights

You should only purchase NATV tokens for the rights to use and access our freelance and affiliated networks, utilities, and services. If you decide to personally not use the tokens on our network then you may transfer, sell, or trade your NATV tokens at any time through our network or through an independent cryptocurrency exchange. Purchasing Native tokens (NATV) does not provide any percentage of equity, ownership, or rights to revenue, or profit sharing in the operating business, networks, or platforms of Native Currency LLC, or GIGB2B INC.

Time Line

Following our Token Sale we will be completing the following projects.

- Distribute NATV Tokens to all investors (Transferred immediately upon purchase using MyEtherWallet.Com or Mist)
- Improve and expand the gigb2b.com freelance website and integrate NATV Tokens for bidding, commissions, payment, escrow, and release of funds. (October 2017)
- Token holders gain access to trade NATV tokens through multiple cryptocurrency exchanges. (October – December 2017)
- Develop and release a simple and affordable payment solution that will enable any employer to pay any freelancer or employee regardless of the project location, freelancer location, or hiring platform using NATV tokens. (December 2017)
- Develop local hubs that allow NATV token holders access to exchange NATV Tokens into local currency. (January 2018 +)
- Develop additional products and services that can provide benefits to the freelance and small business industry (We have several projects in the pipeline including webhosting, storage, etc) (Ongoing Release and Dates to be Determined following the token sale)

Risk Factors

The acquisition of Tokens and cryptocurrency involves a high degree of risk. Before acquiring NATV tokens, it is recommended that you consider all risks involved and that you do not invest more than you can afford to lose. Although we may not know or list every specific Risk Factor, the following risk factors should be considered before purchasing NATV Tokens.

Disclaimer

The purpose of this White Paper is to present the Native Token project to individuals and entities interested in cryptocurrency, the NATV token, and in the freelance and business to business employment services industries. This communication shall not constitute an offer to sell or the solicitation of an offer to buy securities.

The purchase, ownership, receipt, or possession of NATV Tokens carries no rights, express or implied, other than the right to use NATV Tokens as a means to enable access, bid, pay for service, and use our affiliated Marketplaces once successfully completed and deployed. In particular, you understand and accept that NATV Tokens do not represent or confer any ownership right or stake, equity share, stock, option, security, or equivalent rights, or any right to receive future revenue shares, profit sharing, intellectual property rights or any other form of participation in or relating to the network, marketplace, affiliates, and/or Native Currency LLC and/or GIGB2B INC, its holding companies or their respective subsidiaries (the "Group", and each a "Group Company") and its corporate affiliates, other than any rights relating to the provision and receipt of Packages in the marketplace, network, or platform, subject to these Terms. The NATV Tokens are not a security, commodity, or any kind of financial instrument.

Important Note: As noted elsewhere in these Terms, the Tokens are not being structured or sold as securities, commodities or any other form of investment or structured product. Accordingly, none of the information presented here is intended to form, or constitutes, the basis for any investment decision, and no specific recommendations are intended or made.

The Risk Disclosures is not intended to be, and is not, a complete summary of all risks associated with your purchase of NATV Tokens. You should make independent enquiries to ensure you have all information to independently assess whether you should purchase NATV Tokens. The Company expressly disclaims any and all responsibility for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from: (i) reliance on any information contained on this document or website, (ii) any error, omission or inaccuracy in any such information or (iii) any action resulting from such information.

Consult your financial advisor and/or attorney prior to any purchase of cryptography tokens.

By purchasing, owning, and using NATV Tokens, you expressly acknowledge and assume the following risks:

- I. You are purchasing NATV tokens for the rights to access and use our network and affiliated networks including but not limited to service utilities that primarily serve the freelance, employment, and business industries.
- II. The information on this website and token sale has not been approved or verified by the United States Securities and Exchange Commission or by any state or government securities authority.
- III. The purchase of NATV tokens may not be suitable for you and involves a high degree of risk.
- IV. This site and token sale is in no way a solicitation or offer to buy or sell securities. The purchase of NATV tokens does not grant you equity or ownership interest in Native Currency LLC or are affiliates or partnerships.
- V. We are currently in development of some of our services and features that will utilize NATV tokens and although we expect to complete development by the time lines listed, make no guarantees to the actual completion timeline.
- VI. We are dependent on raising funds in the token sale or future distributions to fund certain features that we plan to integrate into our network and services. If we raise substantially less than our token sale goal, we will have a difficult time completing our most desired future network projects.
- VII. We are highly dependent on the Ethereum network and blockchain technology. Disruption in either would be detrimental to NATIVE CURRENCY LLC and NATV tokens and may cause disruptions including loss of access to our network, utilities, or affiliates, as well as potential loss in value for NATV tokens.
- VIII. In the event the value of ETH fluctuates unfavorably during or after the token sale, we may be limited in our ability to fund future development projects or to maintain the network, marketplaces, and affiliated relationships.
- IX. We can offer no assurances that a system wide failure of Ethereum, blockchain, other cryptocurrencies, trading exchanges, the internet, our own websites, or any computer infrastructure would not negatively affect our tokens and owners.
- X. We can provide no service, support, or guarantee to the pricing accuracy or your ability to liquidate your NATV tokens on any third party exchange.
- XI. Native Currency LLC will not support or otherwise facilitate any secondary trading or external valuation of NATV tokens. Any such trading or valuations will be through third parties for which we can provide no guarantees, services, or support. In the event, secondary trading of NATV tokens is facilitated, these exchanges may be susceptible to fraud or manipulation. Furthermore, to the extent that third parties do ascribe an external exchange value to NATV Tokens there is no guarantee as to the value which may be extremely volatile and diminish to zero.
- XII. We provide no guarantees to the rights to networks, affiliates, utility use, applications, or value of the NATV token now or at any time in the future.
- XIII. NATV Tokens are uninsured unless you specifically obtain private insurance to insure them. Thus, in the event of loss or loss of utility value, there is no public insurer or private insurance arranged by Native Currency LLC or are affiliates, to offer recourse to you.

- XIV. There are substantial risks associated with uncertain regulations and enforcement Actions. It is impossible to predict or know for sure how or whether government or regulatory bodies may apply existing law and regulation with respect to such technology and its applications, including our products, services, network, affiliations, token sale, and NATV Tokens. It is likewise difficult to predict how or whether government or regulatory bodies may implement changes to law and regulation affecting distributed ledger technology and its applications, including the any and all use for the NATV token. Regulatory actions could severely negatively impact our network, marketplace, community, values, and use of NATV tokens in various ways, including but not limited through a determination that NATV Tokens are a virtual commodity, a digital asset or money, securities or currency, that the purchase, sale and delivery of NATV Tokens constitutes unlawful activity, or that NATV Tokens are a regulated instrument that require registration or licensing of those instruments or some or all of the parties involved in the purchase, sale and delivery thereof. The Company may cease operations in a jurisdiction in the event that regulatory actions, or changes to law or regulation, make it illegal to operate in such jurisdiction, or commercially undesirable to obtain the necessary regulatory approval(s) to operate in such jurisdiction.
- XV. There are substantial risks with hacking and security. Due to malicious groups and organizations, there are risks to the network and marketplace including but not limited to malware attacks, denial of service attacks, consensus-based attacks, Sybil attacks, smurfing and spoofing. Furthermore, because the network and marketplace is based on open-source software, there is a risk that a third party or a Company Party may intentionally or unintentionally introduce weaknesses into the core infrastructure of the network or marketplace, which could negatively affect the network or marketplace and the NATV Tokens, including each utility.
- XVI. It is possible that alternative marketplaces could be established that utilize the same open source code and protocol underlying our network and marketplace and attempt to facilitate services that are materially similar to our network and marketplace. Native Currency may compete with these alternatives, which could negatively impact the network and marketplace and NATV tokens, including the utility of the NATV tokens for utility uses on our networks and marketplaces.
- XVII. The tax characterization of Tokens and cryptography is uncertain. You must seek your own tax advice in connection with purchasing NATV tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.
- XVIII. It is possible that our affiliated networks, marketplaces, and communities will not be used by a large number of individuals, companies and other entities or that there will be limited public interest in the creation and development of distributed marketplaces. A lack of use or interest could negatively impact the development of the marketplace and therefore the potential utility of the NATV Tokens.
- XIX. We are developing NATV Tokens to operate and provide network access to the freelance community as well as other freelance networks in the future. Although we believe NATV token holders and other employers and freelancers will greatly benefit from this integration, we cannot provide any assurances, guarantees or reliability to the future success and usage of the communities, members, or networks that we work with, partner with, or are affiliated with. Additionally, we are highly dependent on the success of our

integration of the NATV token and our freelance network and there is no guarantee that this integration will be successful.

- XX. Your use of NATV tokens on our affiliated networks, websites, platforms, communities, and marketplaces will require your use and acceptance of their own terms and conditions, risk factors, and disclaimers. Native Currency, LLC provides no assurances, guarantees, warranties, promises, or claims for using NATV tokens through our own network and marketplace or any affiliated network, website, platform, community, or marketplace.
- XXI. Our NATV token as well as blockchain technology has limitations and is in its early stages of development. This carries multiple risks to all investors and users including many risks that we may not foresee.
- XXII. It is possible that, due to any number of reasons, including, but not limited to, an unfavorable fluctuation in the value of ETH (or other cryptographic and fiat currencies), decrease in the NATV Tokens' utility, the failure of commercial relationships, or intellectual property ownership challenges, our affiliations, partnerships, networks, and marketplaces may no longer be viable to be developed or to operate, or the company may dissolve.
- XXIII. NATV Tokens offer no governance or voting rights of any kind with respect to the network, marketplace, community, affiliations, or Native Currency LLC, all decisions involving Native Currency LLC and NATV Token development and our products, services, and affiliations will be made by Native Currency LLC at its sole discretion, including, but not limited to, decisions to manage, establish, expand, or discontinue its products or services in the network, community, or marketplace, to establish or terminate affiliate or partnership agreements, or to sell or liquidate the Company. These decisions could adversely affect the network and marketplace as well as the utility use of the NATV tokens you own.
- XXIV. Our price or value per NATV token may be effected by other cryptocurrencies such as Bitcoin and Ethereum among others. Native Currency has no control over the price of other crypto currencies, however we most likely will be affected by their price.
- XXV. The cryptocurrency industry and trading exchanges have experienced several outages, thefts, and are highly volatile. We will take all reasonable measures to make our network as strong and secure as possible, however we cannot provide a guarantee against loss, theft, or volatility now or anytime in the future.
- XXVI. We will begin distributing all non-reserved NATV tokens shortly after our token sale through individual freelancer member claims on the gigb2b network. Any registered freelancer of the gigb2b community can claim up to 25 NATV tokens for joining the gigb2b network, for completing specific job tasks through the community, for accepting Native tokens as payment, and for being awarded freelance jobs on any of the top freelance networks. Freelancers are required to claim their initial NATV tokens through gigb2b.com using an ERC-20 wallet within 30 days of joining or their rights to claim their free 25 NATV for joining gigb2b are cancelled and the 25 NATV tokens reserved for them will be distributed by Native Currency LLC through third party exchanges. All NATV distributions to freelancers will last until 75% of all NATV is distributed on the blockchain. The remaining 25% of NATV will be held by Native Currency, LLC for future corporate uses. Any Distribution for unclaimed tokens through third party exchanges by Native Currency LLC will be used for general corporate purposes including marketing and developing the network. Although we believe this distribution model will

successfully grow the international community of NATV users along with establishing a fair price per NATV token, there is no guarantee that this form of distribution will not negatively impact the current or future value of our tokens.

- XXVII. We have reserved 5% of our tokens or 1,500,000 NATV to be issued to our affiliated developer GIGB2B, INC to be used towards future development and access to their network. In doing so, GIGB2B, INC may sell these tokens through future cryptocurrency exchanges which may negatively impact the value of our tokens.
- XXVIII. We have donated the rights to a total of 1 Million NATV tokens to non-affiliated non-profit organizations. These non-profit organizations can claim and gain access to their NATV tokens at any time and in return can sell these tokens through cryptocurrency exchanges which may negatively impact the value of our tokens.
- XXIX. Our price per token will be affected by the total number of users, platforms, networks, and exchanges established using NATV tokens.
- XXX. NATV Token holders may be subject to pay sales or income taxes that are beyond our control. It is the responsibility of each token holder to comply with all tax laws of the United States and any other jurisdictions in which they reside.
- XXXI. There may be substantial other risks that are not foreseen or outlined by us at this time. All purchases of NATV tokens is subject to your own risk.
