

## ***THE WORLD'S LEADING RESEARCH PLANTER CONTROL TECHNOLOGY***

### SRES Research Planters

GROUND BREAKER Precision Agriculture in partnership with SRES, design and manufacture versatile, efficient, ergonomic and comfortable seed research planters, manufactured to plant more seed in wider varieties, faster and with greater accuracy. There are many research planter models available. These include:

- Standard Research Planter
  - Flex Planter
- Ultra Narrow Planter
- Runabout Planter
- Mini Seed Planter
- Drill Planter

### SRES Step 4 Controls

The Step 4 Control package is the most technologically advanced, yet simplest to use research planter control package on the market. Create field plots from the comfort of your office, view field plot layouts on your computer screen, and detect pivot irrigation tracts, waterways, drainage channels, field obstructions, poor growing areas and sub soil constraints. It's simple to verify your field boundaries with 360 degree rotation of your plots, guaranteeing the plot to be square without marking an AB line.

The Step 4 control package also allows you to plant when you get to the field, tripping the planter with perfection with no extra or missing packets at the end of the first pass. All points in a plot are traceable and GPS-compatible with any RTK signal. You can even change layouts in the field in minutes with random plot lengths and populations. Using the Global Plot Management System, our technology is the most advanced in the industry.

## ***THE MOST TECHNOLOGICALLY ADVANCED, COMMERCIALY RELEVANT RESEARCH PLANTERS ON THE MARKET***

### GROUND BREAKER Research Planters

GROUND BREAKER Precision Agriculture design and manufacture quality research planters that utilise commercially available precision hardware including Ag Leader and Precision Planting for the best commercially-ready research solutions. Our research planters apply the world's most advanced and user-friendly precision technology including:

- Ag Leader InCommand 1200
- Ag Leader SureDrive
- Precision Planting 20/20
- Precision Planting vDrive

**Ag Leader®**
