

Dear Community Leaders,

Please see below the email prompt to share with community members that covers a brief sense of timeframe and how they can reach the project team.

The City of Riverdale is excited to engage with our valued community members through numerous, exciting events as we move into the next stages of our PACT Plan. The Riverside PACT includes four different areas of study: Pedestrian Target Safeguarding Plan, Active Transportation Plan, Complete Streets Ordinance, and Trails Master Plan. Our goal is to provide improved comprehensive and accessible transportation options for all residents and visitors. More detailed information on the project is available on our website: RiversideCA.gov/PACT

From mid-November through March 2020, the planning team will be at many community events around the City to engage with you – the real experts on Riverside and its needs.

We also want to meet you where you are, and have developed a short online survey to learn about your habits, needs, concerns, and desires for walking and biking in Riverside. You can take the survey here: surveymonkey.com/r/RiversidePACT

Once we understand your priorities, we will draft plans and review them with the community, with the goal of adopting the PACT by Summer 2020 and moving forward with an actionable plan.

We look forward to connecting with you and hearing your feedback to make Riverside safer, healthier, and more sustainable.

If you would like to get in touch with the project team, contact us at RiversidePACT@altaplanning.com.
