

# Project Management, Planning, IOT&A Implementation & Warehouse Support

VA Northern California Health Care System  
September 2017 - Ongoing

The Veterans Choice and Accountability Act of 2014 (Public Law 113-164) authorized VA to procure 27 new major facility leases nationwide. Community-based clinics in Chico and Redding, CA are being completed as priorities for VA Northern California Health Care System (VASDHSC) to deliver state-of-the-art facilities that improve and expand access to health care for veterans.

In September of 2017, GoE was awarded an indefinite delivery order indefinite quantity (IDIQ) contract with multiple task orders, to support planning, interior design, outfitting, relocation, warehouse support and activation of community-based outpatient clinics for VANCHSC. The two build-to-suit leased clinics (approximately 42,000 SF in Chico and 77,000 SF in Redding) will support patient aligned care team (PACT) based primary care with integrated mental health and associated ancillary and specialty care. Co-located specialty care at the Redding outpatient clinic includes multiple medical and surgical specialties, homeless and urgent care.

GoE is supporting VANCHCS community-based outpatient clinics with the following services:

- Comprehensive project management support, including design charrette facilitation and integrated master scheduling
- Clinical operations planning
- Existing inventory and reuse analysis
- Mock-up-based simulation exercises of future operations
- Interior design and medical equipment planning complete with room-by-room equipment lists and layouts
- 3D design renderings
- Acquisition support including market research and procurement package development
- Design review support for operations and MEP
- Logistics and warehouse support
- Transition planning and staff training
- Outfitting (furniture and medical equipment), installation and testing
- Activation and physical relocation
- Strategic communications (STRATCOM) planning
