BlueMed Participatory Workshop

Blue Economy in the European basins

Marine Responsible Research and Innovation in Science, Innovation and Society
RRI-SIS MARINA 2018 - Science Centre AHHAA in Tartu, Estonia.

Wednesday, September 19

9.00 – 13.00

BLUEMED is the European research and innovation Initiative for promoting the blue economy in the Mediterranean Basin through cooperation. It is the strategy of reference for the Mediterranean countries to work together for a healthy, safe and productive Mediterranean Sea. The BLUEMED Initiative aims to contribute to the creation of new 'blue' jobs, social well being and a sustainable growth in the marine and maritime sectors through the implementation of its Strategic Research and Innovation Agenda, the BLUEMED SRIA, with an eye on keeping it constantly up-to-date and inclusive of a multiplicity of perspectives. Within the multiconference RRI-SIS MARINA 2018, the BLUEMED CSA promotes a workshop aimed at sharing experiences and ideas with different international projects present at the Conferences and discussing with participants possible input for implementing the SRIA and the Bluemed initiative according to the RRI principles. The workshop will be introduced by a brief presentations of the state of art of some specific issues in the marine domain identified as potential areas for the development of Blue growth, with a strong reference to results already emerged during the Multi-Conferences, that aims at exporing RRI approach both in the research and in the evidence based policy making process related to coastal areas and seas. The proposed workshop is particularly suitable to the declared aim of the conference: "The ambitious outcome of the event is the definition of recommendations for improvement of evidence-based policy making for seas and coastal zones through RRI-mechanisms, and furthermore how this improvement could be institutionalised"1. With the collaboration of the Co-Create Project (Adriana Valente, Valentina Tudisca, Claudia Pennacchiotti, Michela Majer – IRPPS National Research Council, Italy)
