

Care Planning

COVID-19 (coronavirus disease 2019) is respiratory tract infection due to a novel coronavirus, SARS-CoV-2 (initially called 2019-nCoV); as of March 11, 2020, extent of infection was declared pandemic by the WHO

- Infection ranges from asymptomatic to severe; symptoms include fever, cough, and (in moderate to severe cases) dyspnea; disease may evolve over the course of a week or more from mild to severe. Upper respiratory tract symptoms (eg, rhinorrhea, sore throat) are uncommon.
- A significant proportion of clinically evident cases are severe; the mortality rate among diagnosed cases is about 2% to 3%

Care plan recommendations

The following Evidenced Based Care Plans are recommended for the care of COVID-19 patients. Please remember that the appropriate Care Plan(s) are selected and individualized based on the assessed needs of the patient.

- Pneumonia Adult
- Pneumonia Pediatrics
- Sepsis/Septic Shock Adult
- Sepsis/Septic Pediatrics
- Mechanical Ventilation Adult
- Mechanical Pediatrics
- Fever Adult
- Fever Pediatrics
- ARDS Adult
- ARDS Pediatrics
- Anxiety Adult
- Anxiety Pediatrics
