

# GoChip Beam

## Getting Started

- 1 Beam may require charging**  
Use the included cable to charge your beam. **If charging is needed, please allow 6-8 hours to fully charge (Beam may be used while charging).**
- 2 Download app, create account & log in**  
Visit [gochip.com/apps](http://gochip.com/apps) on your smart phone, tablet or PC to download the app, then create an account and log in.
- 3 Power on Beam**  
Press and hold the power button for 3 seconds until the right light turns solid green. You can connect when the middle white light "ashes" 8 times. Wi-Fi light will take 40-50 seconds to begin "ashing".

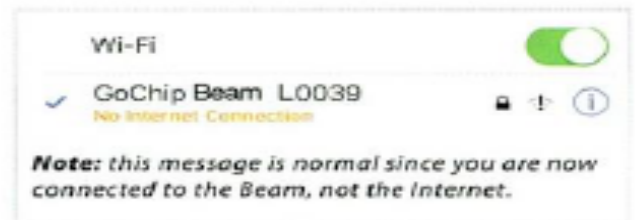

- 4 Connect your device**  
On your mobile device, open **Settings > Wi-Fi** to connect to the GoChip Beam.  
**Please note:** See label on your Beam for network name and password, then wait for an indication that your device is connected.

**Please note:** When you connect to your Beam, your device may let you know that you are no longer connected to the Internet. **This is expected behavior** because you are now connected to the Beam and not to the Internet—giving you access to all your movies & TV shows without Internet access or downloading.

- 5 Just Play!**  
Start the GoChip Player App and enjoy your movies and TV shows. You can connect up to 8 devices at the same time: each person playing what they want, when they want.

- 6 Power off Beam**  
Press and hold the power button for 3 seconds until the right light turns off.

- 7 Need help or want to learn more?**
