Go to https://scratch.mit.edu/

Getting Started

1) Select the Cat icon “try it out”

2) Select a background from the site collection. Alternatively you can upload one or create a new one.

3) Choose a sprite from the site collection. Alternatively you can upload one or create a new one.

4) These are the elements you can control through the code (or “script”) you write.

5) Let’s start by trying to build a code that matches the one to the right.

6) Test it with the green flag.

7) Try it full screen!

8) When you have mastered that, begin to change elements – change motion, events, looks, controls, etc...

9) Think about what you could assign students to do e.g. Get a unicorn to walk across the water...

Make 2 bats land on top of a palm tree

10) Create a scratch code and share with your classmates
