

## Why Bees are Important for Fruit Production.....

Passive Self-Pollination  
(No Bees, Some Wind)

Passive Self-Pollination  
(No Bees, No Wind)

Open, Insect-Pollination  
(Bees and Wind)

Passive Self-Pollination  
(No Bees)

Open, Insect-Pollination  
(Bees)

1 out of every 3 bites of food you eat is a result of an animal pollinator....

*Have you thanked a Bee Today?*
