

Dear, Monte Students

First of all I want to thank all students that participated in the Global Climate Strike on March 15th, by showing up and or helping organize such an important event. The issue about climate change is that it's threatening our future and we as students need to help take action. The reason why I'd like to be involved is because I have seen changes here in New Mexico: hotter temperatures over the years, extreme weather that has lead to wildfires, and droughts. The burning of fossil fuels, cutting down of rainforests in the amazon and the melting ice in Antarctica are a huge part to how our world continues changing. I can't stress enough how important it is to take action. We don't have a lot of time, let's be the change.
