● Team ● Marketing, advertising and exchange listing ● Token Sale

### **Exchange**

*Exchanges are our main goal.*

*Bittrex and HitBTC is in planing for 01/05/2018*

*Binance is in the planning for 01/07/2018 but for that we only need a certain trading volume.*

### **Vision**

*Our vision is quite simple:*

*We want our community to grow!*

*Many people have missed the hype around Bitcoin and co. and now we give peoples a new chance, because of the token model, we are sure that our token will rise, but there is no guarantee but we try it.*

### **Why we are difference?**

*We are the only ICO thats repay the investor money (48% of the investments in Ethereum)*

*We are still in the beginning but we are working hard to grow our community;-)*

## **How does this work?**

Repayment program:

01.06.2018 - 01.05.2019

The rate is fixed: 0.00004 ETH per SYC Token (48% / 12 Months = 4%)

This means when you hold 1000 SYC Tokens in your wallet, you become 0.04 ETH every first day of the month.

You can always sell your tokens or buy more at the exchange, the more tokens you hold in your wallet, the more you get from our repayment program.

After 12 months, the repayment program ends and 48% of the ICO revenue were paid back to the SYC token holders.

**Your Ethereum address will be automatically noted for the repayment program in our system, you will automatically receive the 4% in ETH every first day of the month.**

## **What happens to the remaining 52%?**

They remaining 52% will be invested in a portfolio of 20 different cryptocurrencies to generate profit for our SYC Token holders.

The portfolio is balanced with the top 20 market cap coins and is updated every quarter and the portfolio is publicly accessible for our community.

Every quarter, the profit from the portfolio is distributed to our Token Holders.

### **Example:**

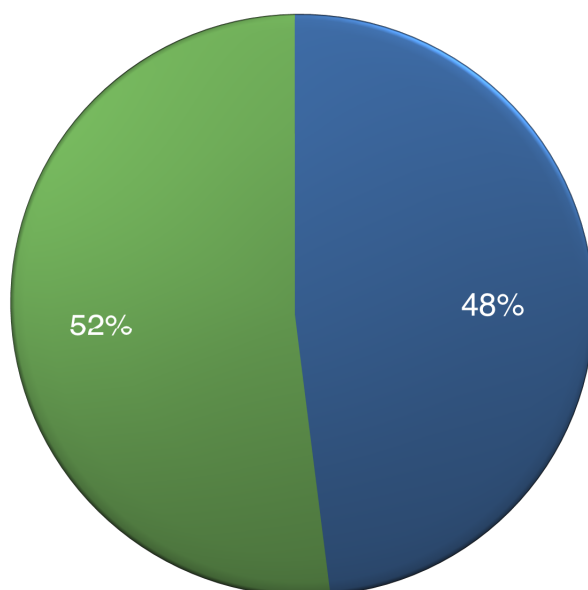

- remaining profit from ICO 1000 ETH (52%)
- portfolio has made 25% profit in the last quarter
- the portfolio has made 250 ETH profit
- we have 100k SYC tokens among the people as holder
- 250 ETH / 100k Tokens = 0.0025 ETH
- every holder gets 0.0025 ETH per SYC Token directly to his wallet

**If the portfolio does not make a profit in a quarter or make loses, we postpone the payout to the next quarter.**

**The portfolio will be created on 01.06.2018**

### ***SYC token holder payment***

● Repayment                      ● Portfolio

### ***How does the token generate profit?***

#### ***Quite simple:***

*Due to the low supply of the token, a rise of the token value is guaranteed.*

*The demand of the SYC Tokens is very high as the fixed rate of 4% is independent of the Token price.*

*Each holder therefore benefits from buying and hold the tokens. This increases the demand and also the price and of course every holder benefits from the SYC portfolio.*

### ***Why are the 48% paid out to 12 months?***

*We pay 48% from the investment in month to avoid flooding the market and to ensure that the token is stabilized.*

*Most of them will hold their tokens as they want their 48% back and new people will buy the tokens to participate in the program.*

*Furthermore, we are listed on good exchanges and have a growing community.*

*When do we get the Tokens?*

*The tokens should be visible in your wallet within 12-24 hours after participation and confirmation of the Ethereum transaction.*

*Who can participate in our token sale?*

*Everyone can participate in our token sale.*

*We have no restrictions!*

*Every country and every human is welcome.*
