Introduction

The U.S. Department of Energy (DOE) Rocky Flats Site was closed by a Corrective Action Decision/Record of Decision (CAD/ROD) signed on September 29, 2006. Post-closure funding is provided to CDPHE by DOE pursuant to the terms of the RFLMA (2012).

The RFLMA is a joint Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) § 120 Federal Facility Agreement and Colorado Hazardous Waste Act (CHWA)/Resource Conservation and Recovery Act (RCRA) Consent Order between DOE, the U.S. Environmental Protection Agency (EPA), and CDPHE. RFLMA identifies CDPHE as the overall lead regulatory agency for the post-closure/Legacy Management (LM) period under CHWA/RCRA and expressly provides for the recovery of state costs. Per paragraph 73 of the RFLMA, CDPHE chooses to enter into a grant to provide for the payment of CDPHE's costs for calendar year 2019.

Organization

Staff in the Hazardous Materials and Waste Management Division (HMWMD) conduct CDPHE activities required by the RFLMA, including arranging participation by other State entities (e.g., the Governor's Office and the Attorney General's Office). The RFLMA Coordinator/Project Manager for the State is located in the Corrective Action Unit of the Hazardous Waste Program. The HMWMD administrative staff performs most of the administrative duties.

Work Breakdown Structure

The general activities to be performed by the State using this grant are necessary to demonstrate adherence to requirements contained in the CAD/ROD and in the RFLMA.

The RFLMA Oversight Activities Work Breakdown Structure (WBS) consolidates all LM oversight activities to be performed by CDPHE. These activities may include, but are not limited to:

1. Technical reviews of Rocky Flats Site environmental data, reports, and other documents;
2. Consultation with DOE and EPA;
3. Internal and external communications;
4. Independent collection and/or analysis of Rocky Flats Site samples;
5. Rocky Flats Site Central Operable Unit inspections/visits;
6. Other activities as necessary to provide regulatory oversight pursuant to the CAD/ROD, RFLMA, and CHWA/RCRA; and/or,
7. Professional education and training.

Costs associated with program management, administration, and technical support, are included as a percentage of Personnel in the Budget, according to generally-accepted accounting practices,

which allocate management and administrative costs as follows:

- HMWMD uses the Department's Statistical Distribution System ("SDS") to allocate various management and administrative personal services overhead pools to a variety of federal and state funding sources. The SDS system, approved by the Department's federal cognizant agency, allocates these costs proportionally to funding sources based on the direct labor costs charged to those funding sources. Operating and equipment overhead costs are allocated manually in a similar manner.
- The Department uses cognizant-agency approved indirect cost rates to recover its Department-wide management and administrative costs. These rates pay for a wide range of costs, including Department executive management, financial services (accounting, budgeting and grants management), human resource management, information technology support, office space rental and other miscellaneous services.

Life Cycle Baseline

The activities identified above under the WBS constitute the Life Cycle Baseline for CDPHE oversight of DOE's legacy management activities at Rocky Flats in CY 2019. The estimate of the workload is based on a percentage of full time equivalent (FTE) staff. Projected costs for CDPHE oversight activities for the WBS in CY 2019 are shown in the Funding Request section below. Taking the CY 2019 budget and determining a cost per FTE that includes both personnel and operating costs created the projected costs. This cost per FTE is then escalated at 5% per year to account for inflation. The cost projection for the WBS may increase or drop from year to year as the number of FTEs dedicated to the WBS changes.

Life Cycle Baseline assumptions are as follows:

1. The level of activity for CDPHE oversight is generally related to Rocky Flats site work activity, which is a function of the level of expenditures for LM activities.
2. The consultative and collaborative process envisioned in RFLMA provides for more effective problem solving between regulators and site managers, optimally resulting in more efficient decision-making. CDPHE will continue to have a public information and participation role throughout post-closure/LM.
3. Some unanticipated activities not provided for in the Life Cycle Baseline may be expected. Therefore, an appropriate level of flexibility must be present in the grant to allow for unanticipated activities.
4. CHWA/RCRA post-closure requirements are outlined in the RFLMA. Certain CHWA/RCRA fees are included in the Life Cycle Baseline.
5. Activities projected for out-years in the Life Cycle Baseline, the level of effort for these activities, and the costs for this effort are estimations only. Therefore, the Life Cycle Baseline submitted as part of the annual funding request may have to be revised each year.

Funding is requested for the purpose of continuing to ensure CDPHE staff are familiar with

the Rocky Flats site, and providing redundancy in the event the RFLMA Project Coordinator is unable to oversee activities or work responsibilities change:

- pertinent regulations and permits that govern the long-term operation and maintenance of post-closure activities;
- records and technical documents associated with this facility;
- data;
- ongoing activities and responsibilities, such as inspections, sampling, oversight, and grant activities;
- people and organizations who have some long-term interest in the site;
- public inquiries about the site;
- site history; and,
- various stakeholder concerns.
