LUC has been commissioned to review the findings of the Habitats Regulations Assessment (HRA) of the emerging Melton Local Plan in light of focussed changes currently proposed by the Council. This review aims to establish whether any individual or combination of the focussed changes could result in additional likely significant effects of the plan, or alter the conclusions of the Appropriate Assessment of the Pre-submission Draft Local Plan.

**Focussed changes**
It is understood that the focussed changes would modify the following policies:

- Policy SS2 - Development Strategy
- Policy SS3 – Sustainable Communities (unallocated sites)
- Policy SS4 - South Melton Mowbray Sustainable Neighbourhood
- Policy SS5 - Melton Mowbray North Sustainable Neighbourhood
- Policy C1(a) – Housing Allocations
- Policy C1(b) – Reserve Sites
- Policy C2 – Housing Mix
- Policy C4 - Affordable Housing Provision
- Policy C6 - Gypsies and Travellers
- Policy IN2 (this was previously titled IN1) - Transport & Strategic Transport Infrastructure
- Policy IN3 (this was previously titled IN2) - Infrastructure Contributions and Community Infrastructure Levy

An additional policy (IN1) in relation to transport infrastructure is also proposed to be included in the plan.

**Implications for the screening assessment**
The majority of the focussed changes are minor, and would not have any implications for the HRA screening assessment. However they would result in the screening in of the effects of one additional

bristol@landuse.co.uk
policy (IN1) and screening out the effects of another (IN2) in relation to transport infrastructure; the implications of the focussed changes on the HRA screening assessment are provided in detail in Appendix 1.

**Implications for the Appropriate Assessment**

While a number of small allocations would be added / removed from the Pre-submission Draft Local Plan and the capacity and boundaries of others would be modified, the overall scale and distribution of growth remains broadly similar, and policies within the Local Plan which provide mitigating effects would not be affected by the focussed changes. While changes to the proposed distributor road are likely to have a significant effect on local traffic movements at Melton Mowbray, these will be much less pronounced on the wider road network and unlikely to be significant on relevant stretches near Rutland Water SPA/Ramsar, which are approximately 5km from the town. See Appendix 2 for details.

A review of local plans for neighbouring authorities has confirmed that the majority have not progressed since the previous Appropriate Assessment was carried out (October 2016), and no additional in-combination effects have been identified (see Appendix 3 for details).

**All findings of the Appropriate Assessment of the Pre-submission Draft Local Plan therefore remain valid, and as such it may still be concluded that the Local Plan (included the focussed changes) would not have an adverse effect upon the integrity of the Natura 2000 network.**
Appendix 1 – Implications for HRA Screening Assessment

Table 1 summarises the focussed changes to the plan currently proposed by the council based on recent correspondence from the council\textsuperscript{2345}, and any implications for the screening assessment\textsuperscript{6}.

### Technical Note

**HRA of Proposed Focussed Changes**

<table>
<thead>
<tr>
<th>Policy</th>
<th>Summary of focussed changes</th>
<th>Implications for HRA screening</th>
</tr>
</thead>
</table>
|        | developers and others to deliver a transport strategy for Melton Mowbray. The MMTS will comprise the following key components, to be funded and delivered by private developers and the public sector:  
(a) A Melton Mowbray Distributor Road (MMDR) from the A606 Nottingham Road to the A607 Leicester Road around the east of the town, in accordance with the broad design standards and requirements outlined in paragraph 8.3.17, for which a ‘corridor of investigation’ is shown on the Policies Map; and  
(b) A package of complementary measures, including enhanced pedestrian, cycling and public transport facilities and access to the town centre and the other main local journey attractors from the southern and northern urban extensions.  
If development is proposed within the corridor shown on the Policies Map, it will be permitted provided that it has been demonstrated to the satisfaction of the Local Highway Authority that it would not prejudice the ability to deliver the MMDR as a whole.  
Where necessary, the Council and/or the Local Highway Authority will use its compulsory purchase powers to deliver section(s) of the MMDR.  
Where a transport assessment indicates that development will add to the cumulative traffic and other transport problems of Melton Mowbray, a financial or in kind contribution will be sought towards delivery of the MMDR and/or complementary measures proposed through the wider MMTS, including appropriate mitigation necessary to reduce local traffic impacts whilst the MMDR is incomplete.  
The Borough Council will also work with other bodies to explore opportunities to enhance the public realm in and around Melton Mowbray town centre arising from the development of the Strategy.’ | additional traffic. The policy could have uncertain effects on Rutland Water SPA and Ramsar in relation to damage or loss of habitat (offsite), non-physical disturbance (offsite) and air pollution. |

The provision of a Melton Country Park Greenway should be deleted from Policy IN1 (now IN2) and incorporated into Policy SS5. Reference for requirement ‘to contribute to’

**Change:**

No Likely Significant Effects. This policy previously included proposals for two section of distributor road (north and south).

Appendix 2 – Implications for Appropriate Assessment

Rutland Water SPA/Ramsar site

Physical disturbance/loss of habitat (offsite) and non-physical disturbance (offsite)

These effects were considered with regards to the three proposed allocations at Asfordby, as the settlement closest to an area of functionally linked land (Priory Water), however it was concluded in the HRA of the Pre-Submission Draft Local Plan that the proposals would not have an adverse effect due to the scale and location of proposed development at the settlement.

The focussed changes would result in a reduction in the capacity of the closest of the three sites (ASF1) and the removal of another (ASF3), therefore the effects of the Local Plan would arguably be reduced as a result and the conclusion of the Appropriate Assessment remains valid.

Disturbance from recreation

These effects were considered in the HRA of the Pre-Submission Draft Local Plan with regards to the total number of houses proposed in the plan (6,125). It concluded this would not have an adverse effect due to the mitigating effects of other policies in the plan and favourable management at Rutland Water, and referred to the conclusions of the HRA for the Anglian Water Resources Management Plan.

The focussed changes do not affect the mitigating policies within the Local Plan and will not significantly change the overall housing numbers, therefore the conclusion of the Appropriate Assessment remains valid.

Air pollution

These effects were considered in the HRA of the Pre-Submission Draft Local Plan with regards to the general scale and spatial distribution of residential development likely to generate traffic on two specific stretches of road which run within 200m of the Rutland Water SPA/Ramsar, namely the A606 from Oakham towards Stamford and the A6003 from Oakham towards Corby. The Appropriate Assessment concluded that the Pre-submission Draft Local Plan would not have an adverse effect on the basis of the distance from Melton to Rutland Water and the anticipated patterns of traffic dispersal away from the town.

The distributor road, which was referred to in the Pre-submission Draft Local Plan, but is now clarified in the focussed changes through IN1, would extend from the A606 at Potter’s Hill running to the north, east and south of the town to the A607 at Eye Kettleby. Two stretches of the distributor road would be incorporated into the South Melton Mowbray Sustainable Neighbourhood (Policy SS4) and the Melton Mowbray North Sustainable Neighbourhood (Policy SS5), and the remainder of the distributor road would link the two following a route around the east of Melton Mowbray. Any changes in traffic (compared to the references to the distributor road in the Pre-submission Draft Local Plan) are unlikely to be significant on the wider road network, including the two stretches of road closest to Rutland Water SPA/Ramsar. The focussed changes would also not significantly alter either the general scale or spatial distribution of development proposed in the Local Plan, and as such it is considered that the conclusion of the Appropriate Assessment with regards to air pollution remains valid.
Grimsthorpe SAC

Disturbance from recreation

These effects were considered in the HRA of the Pre-Submission Draft Local Plan with regards to the general scale of residential development in the Pre-submission Draft Local Plan as a whole, and it was concluded that it would not have an adverse effect on the basis of the mitigating effects of certain policies within the Pre-submission Draft Local Plan and the lack of threats identified in the Site Improvement Plan for the site.

Given that the general scale of development proposed in the focussed changes to the Pre-submission Draft Local Plan remains broadly the same, and that those other mitigating policies remain unaffected by the focused changes, it is considered that the conclusion of the Appropriate Assessment remains valid.
Appendix 3 – Changes to in-combination effects

The following neighbouring authorities were identified as relevant for identifying potential in-combination effects as part of the original HRA of the Pre-Submission Draft Local Plan7. That work has now been reviewed in order to identify any relevant local plan documents or HRA work which has been published since the previous Appropriate Assessment was carried out (October 2016), which might identified further in-combination effects.

**Rushcliffe Borough Council**
- Rushcliffe Local Plan Part 2 – Issues and Options consultation carried out in Feb/March 2017.
- No HRA work carried out to date - no in-combination effects to consider.

**Newark and Sherwood District Council**
- The HRA screening identified Likely Significant Effects on two sites; Birkland and Bilhaugh SAC and Sherwood Forest ppSPA. Neither of these would be affected by the Melton Local Plan, therefore there are no in-combination effects to consider.

**South Kesteven**
- No further updates to the local plan - no in-combination effects to consider

**Rutland County Council**
- No further updates to the local plan - no in-combination effects to consider

**Harborough District Council**
- No further updates to the local plan - no in-combination effects to consider

**Charnwood Borough Council**
- No further updates to the local plan - no in-combination effects to consider

---

7 As set out in Appendix 3
