

NEW ENGLAND LEAN CONSORTIUM

Lean Leaders Meeting

New England Lean Consortium

Hosted by: [Wunderlich-Malec](#)

Winslow, Maine

Wunderlich-Malec

Engineering | Systems | Services

The New England Lean Consortium will be holding its November Lean Leaders Meeting at **Wunderlich-Malec** on Friday, November 8th. Current members include companies from Maine, Massachusetts, and Rhode Island. You are invited to attend the November 2019 Lean Leaders Meeting.

Wunderlich-Malec opened its Winslow, Maine plant in September 2001 to provide Protective Relay and Control Panels for the Power market and Process Skids. In 2004 the business expanded to meet the needs of the Modular Integrated Control House market. Our engineering and systems integration skills provide added value to customers by designing innovative solutions that reduce costs and improve the quality of our Modular Solutions.

In 2016 Wunderlich-Malec completed its Maine facility expansion uniquely designed for Control House and Skid Manufacturing. This modern manufacturing facility is designed for high quality, high volume fabrication using the latest technologies. The facility is certified to ISO 9001:2015.

Who Should Attend?

--Those companies that have a Lean Program and would like to take their CI program to a new level.

--Those companies that would like to benchmark with other companies in New England.

Meeting Content A Lean Leaders Meeting is an opportunity to learn new approaches to improving a Continuous Improvement Program. Attendees at these meetings can always walk away with some new ideas or new tools that they can apply at their own place of work. The host company benefits from the Meeting through the Plus/Delta Feedback Session as many improving ideas are offered during the session. The main benefit of a Lean Consortium is the fresh pair of eyes that come to a member company, and see the obvious waste. Attendees ask the Why? questions. Why do you do that? Why do you do it that way?

The attendees at a Lean Leaders meeting are all Lean Practitioners, possessing great experience, expertise and skills in Lean. The attendees offer their suggestions for improvement based on what they see and what they hear. It is a great opportunity to have a team of leading Lean Practitioners tour your plant and provide positive, reinforcing feedback.

Date:

Friday, November 8, 2019
