Post by: Bill Addeo

So, the great tree hugger is using God for a helper? Isn't it funny how the pagans use religion against you? Compassion, diversity, restraint, restrictions and the environment are all tools of the trade for the tree huggers. There's a sign at the refuge that reads, " Area and trail closed beyond this point to public entry from Dec 1 - May 1, 8am. To protect Elk on the winter range. National Elk Refuge." It's not about the Elk, it's all about control. Typical of all the bark biters, they will be going in the refuge to do "Studies" but you are not allowed. They see themselves as the keepers of the store. You are an invasive species that must be controlled. They eat meat but hate hunting. They wear leather but don't like fur. They are the hypocrites of society and they lie for a living. The wolf is their tool for eliminating Elk and hunting and now I can tell you,

**I KILLED BEAR 399. So, if Wilkinson is doing a book on bear 399, he needs to talk to me about the bears last moments gasping for air as the cubs ran about. I was there taking pictures and have all the inside information.** So, put that in your pipe and smoke it with your weed. After all, animals are far more important than people!

The workers are too busy earning a living and this is how the liberals have taken control of our natural resources.

One of the penalties for refusing to participate in politics is that you end up being ruled by your inferiors. "PLATO"

America drinks and goes home.....
