

Get2Sport – What have we learnt about social inclusion in sport?

Where are the challenges

Far to few sports clubs – where there are a high concentration of the disadvantaged

Ghetto areas

4 – 5 sports clubs
 1,6 adult per child
 50 % is less than 21 years
 32 % in 3rd grade are obsessive

”normal” areas

more than 20 sports clubs
 4 adults per child
 22 % is less than 21 years
 13 % in 3rd grade are obsessive

Vulnerable members are giving the sports clubs special challenges

+ 2

+ 0

= no matches
 (no clubs)

4 euros has to be spend per child living in the ghettos every time we use 1 euro on a child out side the ghetto to get them to be physical active

A project chaos

- **Lack of strategic thinking**
- **One project is replacing the other**

Experiences and recommendations

The conditions for running a sports club in a social disadvantaged living area is so fundamentally different from what can be expected. Running a sports club under normal conditions is impossible and will not happen in the social disadvantaged areas.

”relief” staff in the sports clubs

Volunteers

Collective

Motivated by interests

Need for volunteers

”Relief” staff

Individual

Motivated by needs

Room for ”relief” staff

Additionality

- More of what we know is working
- Build on what is already existing
- Keep in mind that volunteers would like to better at what they are already good at doing
