

Global Hot Spots: Capricorn New Moon/Annular Solar Eclipse on December 25/26, 2019

Global Hot Spots: Capricorn New Moon/Annular Solar Eclipse on December 25/26, 2019

Dateline Monday December 23, 2019: The Capricorn New Moon on December 25/26 is also an Annular Solar Eclipse — where the lunar orb is too far away from the Earth to completely obscure the disk of the Sun, thereby creating a “ring of light” effect. Nevertheless, while such an alignment of the Sun, Moon and our home planet doesn’t carry the drama of a Total Solar Eclipse, you could consider it equal in intensity.

For the above reasons and since this union of the Sun and Moon is very close to the largest planet in our solar system — Jupiter — we should expect a wide array of Big Happenings occurring on terra firma and within humanity.

Because the double-impeachment of President Trump has just passed the U.S. House of Representatives on December 18, a trial awaits in the Senate — probably taking place in January. However, House Speaker Nancy Pelosi has delayed the release of the impeachments to the Senate until there is some agreement with

Global Hot Spots: Capricorn New Moon/Annular Solar Eclipse on December 25/26, 2019

Senate Republican Majority Leader McConnell about how the trial will proceed. This battle among our national political leaders is shown in this Christmas New Moon/Eclipse by the triple conjunction of Sun-Moon-Jupiter at 5 - 6 degrees of Capricorn below, exactly squaring the Rising/Setting degrees in Libra and Aries, and opposing the Midheaven at 6 degrees of Cancer, the exact placement of Jupiter at the birth of America at our Declaration of Independence on July 4, 1776.

Since Jupiter in Libra is stationary at the birth of President Trump and Nancy Pelosi has her Jupiter in Aries precisely opposite his placement, the transit of Jupiter in Capricorn so close to a polarity to its own position of Jupiter in Cancer from July 4, 1776 sums up the forthcoming struggle of Mount Olympian type mythology. Add on the fact that Nancy Pelosi is born with a triple conjunction of Uranus-Venus-Vesta in Taurus right on the USA Vesta, that Vesta at this New Moon/Eclipse is nearing a direct station 3 days later, and Vesta is in the process of making three returns to its natal USA placement in 2019-2020, and that Juno at 17 Libra is about to unite with President Trump's Jupiter, and it isn't hyperbole to realize that something immense is on the verge of influencing the United States. Plus, the next Full Moon on January 10 — the same day as a Superior Conjunction of the Sun and Messenger of the Gods planet Mercury as well as a station and shift direct by shock-master and radical-change agent Uranus in Taurus — represents the culmination of whatever develops in the two weeks starting December 25/26.

In terms of expansion of consciousness, studying metaphysics and developing astute psychic abilities, this New Moon/Eclipse has plenty to offer as Jupiter's presence with the Sun and Moon can become a source of Providence and Benevolence if you are in the right place, at the right time, and in the right state of mind. Plus, an imagination-enhancing and soul-stirring Sun-Neptune quintile (72-degree alignment) reaches exactitude a little over an hour after the New Moon/Eclipse occurs.

the Senate trial doesn't give John Roberts the same kind of power as a judge in a typical court trial, America will witness an incredible educational lesson about our three-part government with its Executive, Legislative and Judicial branches.
