

## NALJETS New Bombardier 350 joins the fleet

UK-based aircraft management company, Naljets, has taken delivery of a new \$25 million aircraft to add to its growing fleet of luxury business jets hangared at Multiflight Ltd, Leeds Bradford International Airport. The new Bombardier Challenger 350 was flown overnight from the factory in Montréal to the UK by Naljets' managing director Craig McLeod and Captain Peter Riley, and will be managed by Naljets on behalf of an international client.

The aircraft's new home will be Multiflight, a fixed-base operator (FBO) located on the South Side of Leeds Bradford Airport which specializes in looking after private jets and helicopters and provides a range of aeronautical services. The aircraft will be available for private charter alongside Naljets' Gulfstream G200 based out of the UK. With a range of 3,200 nautical miles (5,926 km) the CL350 can reach destinations in the USA, Russia, Middle East and North Africa in a single flight. The aircraft - which is the first of Naljets' aircraft to be adorned with the new company branding following a recent re-brand - joins the company's private Challenger 605 at Multiflight. This was chosen as the new base for the company's fleet due to its ongoing expansion and subsequent need for superior facilities. Co-directors Nick Waters and Craig McLeod felt that FBO Multiflight would provide the ideal solution.

## WINGX ADVANCE Consulting company

Based in Hamburg, Germany WINGX Advance is a data research and consulting company which provides actionable market intelligence to the global business aviation sector. "We believe that by stitching together disparate information on aircraft activity, performance and operations WINGX can derive insights which are currently invisible to our industry," says Managing Directors Richard Koe. "By helping to open up the black box which characterizes much of our industry, WINGX aims to unlock efficiencies and growth opportunities," adds Christoph Kohler, the other MD.

WINGX services include: Market Insight Reports, Customised Research, Operational Dashboards, Strategic Consulting, Market Forecasts and Industry Surveys. WINGX customers include aircraft operators, airframe, engine and avionics OEMs, airlines, maintenance providers, airports, fixed base operators, fuel providers, satellite networks, legal advisors, leasing companies, banks, regulators, investors and private jet users.
