

Wealth Curve

What is the Wealth Curve?

The Wealth Curve is the simple result of a powerful force known as **compound interest**. (When your principal investment gains interest and then your interest earns interest, that's called compounding interest.) To build wealth, you must stay on the Wealth Curve.

At INSIGHT Asset Advisory Group, we will teach you how to get & stay on the Wealth Curve and enjoy the benefits of compound interest.

What does it mean to "Fall Off the Wealth Curve"?

Each time you spend your hard earned cash, you lose all of the compound interest and growth potential your cash would have earned had it remained untouched – impacting your wealth, your children and your posterity.

To stay on the Wealth Curve you simply need to do three things:

1. Keep your money in a place where it can grow uninterrupted and tax protected.
 - A properly structured Dividend-paying Mutual Whole Life Insurance Policy works best.
2. Borrow against your cash value any time you make a major purchase.
 - You can borrow against the "Cash Value" of your Policy any time, no questions asked.
3. Pay yourself back with interest.
 - You were going to pay interest to a Banker anyway – so why not pay yourself?
