

PAD A CHEEK[®]

Barrel Cozy Swift / Swift II

- Place the **Barrel Cozy** over the Swift barrel so the rough Velcro is at the top and visible.
- Gently pull the pillows through the holes, if the hole seems too small make a small slit in the edge of the hole. (The fabric will not fray)
- Wrap the cozy around the barrel and secure with the Velcro.

Always make certain the vent of the Swift Barrel is not covered by the Barrel Cozy.

The **PAD A CHEEK Barrel Cozy** is made of 100% polyester micro fiber and is machine and hand washable with warm water and mild soap. If machine washing, hook the Velcro together before washing for best results. If you have any questions or concerns, please feel free to contact us.
