

ITALIAN LED TECHNOLOGY FOR YOUR AQUARIUM

A family of bars in four spectrum colorations for seven different sizes make GNC SilverMoon the only system of really universal illumination for any typology of aquarium. The light is diffused and with high luminous efficiency; the LEDs of ninth generation have been made a will by GNC to produce beneficent effects on plants and animal species with great durability in the time. This system has a low power consumption, passive dissipation and high degree of materials used provides great reliability; finally the wiring and protection of the LED board is guaranteed by the high-performance Meanwell power supplies.

T5 E T8 REPLACEMENT

Replacing T5 and T8 neon lights is very easy, using the GNC adapters, just attach the SilverMoon bars to the caps of the old neon lights. Adaptable to all traditional systems of any brand on the market.

SILVER HOOK BLURAY AND AM SERIES

A beautiful acrylic hook that allows the anchorage of a SilverMoon to a BluRay and AM Series ceiling light. Composed of two pieces you can center and tilt the bar as you like, orienting it on your aquarium.

SILVER BRIDGE AND SILVER FORK

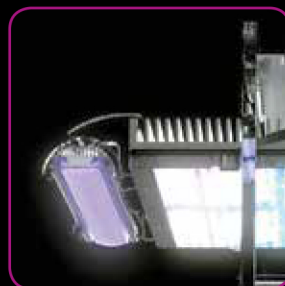

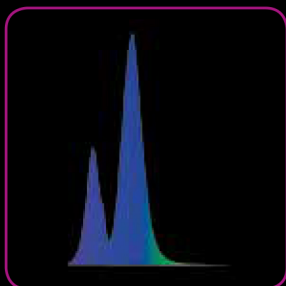

With a beautiful acrylic and steel support you can place the bars to any tank from 35 to 165 cm.

SUSPENSION KIT

If preferred, SilverMoon can be suspended above the tank and anchored to the ceiling using a stainless steel kit.

POWERMOON

It's simple to program the time and the beginning of sunrise and sunset; you can connect and to synchronize up to four bars SilverMoon.
