

COVID-19 UPDATE

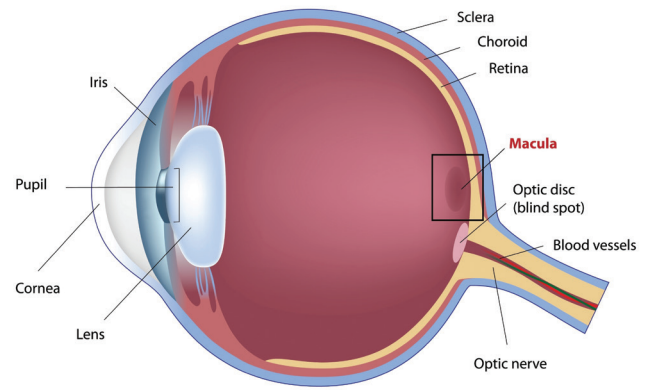

The other Invisible Enemy

The current COVID-19 pandemic is accurately described as a *“War against an Invisible Enemy.”*

For several weeks now, the world has been educated on personal behaviors which slow/stop the spread of this virus.

The positive impact of frequent hand washing, social distancing, wearing masks, etc. is encouraging and in time we will

END THIS PANDEMIC!

After COVID-19 is killed, we're hoping you continue your personal healthcare momentum by fighting another devastating epidemic...Age-Related Macular Degeneration.

Nearly three million Americans every year are diagnosed with partial or complete blindness due to this preventable disease.

Year-round use of quality sunglasses and Blue Light protection glasses are the personal behaviors that can slow/stop this “Invisible Enemy!”

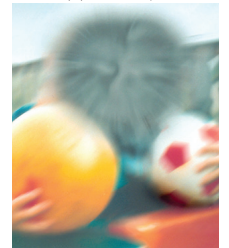

Dr. Jeff Brewer & Dr. Jaimie Kruger

Normal Vision

Same View With AMD

Over exposure to UV radiation from the sun, and to blue light radiation from all electronic devices that are such a big part of our daily lives, significantly increases the risk of AMD.
