Directors Notes

We are all effected by the weather. No matter how advanced our technology gets we cannot escape. We know that all too well in South Louisiana. From the big flood a year ago to the storm of all storms Katrina. We give them names. We compare them to past storms and take pride that we lived through them. Their war stories and we wear them with a badge of honor. Those storms leave us exposed with our lives laid out on the street corner for everyone to see. It leaves us vulnerable and scared and forces us to no longer hide behind the mask of society. We are unmasked and alive for the first time and we find our humanity. I believe our beauty lies in our loss and that is what we are searching for in AOG. The beauty within us when it's all be taken away.

Thanks, Director Garrett Prejean
