Cabin Sole

Teak Lumber / Decking

ABOUT OUR COMPANY

World Panel Products, Inc. is known throughout the Marine Industry as the largest specialty marine wood and composite panels supplier in the USA. We continue to expand and incorporate new products and services, paralleling the requirements of our industry.

We have facilities in key boatbuilding states serving the Great Lakes, Outer banks and Southeast markets. Our knowledgeable staff is well prepared to assist you with your product needs.

With 15 active years in the industry and over a half century of combined experience, we are able to develop new products and coordinate timely delivery for the custom or production boat builder. We manufacture specialty structural and decorative products to the highest standards and regularly travel to inspect production at our factories.

Our structural plywood is Lloyd's certified; our composite panels meet ISO requirements; our Genuine teak and marine lumbers are top grade; our wood veneers are 'A' grade and our custom burls readily available for selection. We truly serve the marine industries of the world.

	Nuestra empresa es la mayor proveedora de tableros marinos de esta industria, en los EUA. Tenemos almacenes en 3 estados importantes del sector. Con muchos años de experiencia, sabemos de las necesidades de los constructores y reparadores de botes de cualquier porte. Nuestros productos son de alta calidad. Realmente servimos la industria naval del mundo.

MARINE PLYWOOD

We take pride in personally inspecting our plywood to ensure it is manufactured in accordance with the BS1088 standard. Thicknesses range from 1.5mm to 40mm and sizes in 2440 x 1220 up to 3050 x 1530mm.

Our BS1088 Okoume plywood offers excellent strength to weight ratio. It is ideal for lighter craft and weight critical areas.

Our BS1088 Hydrocore is made of moderately durable Gurjan, Bintangor or Meranti. It has superior strength and is ideal for hull bottoms, transoms and areas at or below the water line.

Our BS1088 Sapele has a finer grain than the Hydrocore, allowing smoother cuts and less splintering when cutting against the grain. It is preferred by traditional and classic boat

builders and repairers as being a superior product for structural boat components.

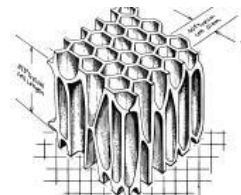

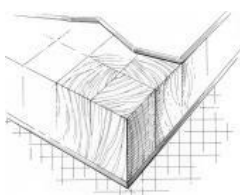

Powerply Rot resistant and Fire retardant is available and in stock at each of our facilities. These products are Lloyd's certified, which is usually specified by many boat builders throughout the world.

SPECIALTY PANELS

Foam Core, Balsa Core, Acoustiply and Honeycomb panels provide excellent structural performance and are extremely lightweight. Polystyrene, Polyethylene and PVC Foams can be used in a variety of densities. Balsa core is available with 7-10lb densities, Acoustiply is typically made with a 6mm center core, although we are able to fabricate the material in a variety of thicknesses. Honeycomb can be produced in your option of nomex, plastic and carbon or aluminum.

These panels are also available in 3-130mm x 2440 x 1220mm up to 3050 x 1530mm. FRP (Fiberglass Reinforced Plastic), HPL (High Pressure Laminates), marine plywood and/or decorative wood veneers may be used in the sandwich, increasing the mechanical properties of the core by stabilizing the cell walls and increasing thermal and acoustic insulation properties. Sizes and thicknesses are controlled to exact tolerances.

Tenmos orgulho em personalmente inspeccionar e garantir que a produción é hecha de acuerdo con la norma naval BS1088. Okoume, Hydrocore, Sapele, y los tableros tratados contra Putrefacción e fuego estan en estoque. Producimos también tableros con composiciones en balsa, acústico, espuma, etc. Nuestras tolerancias son exatas y ofrecemos varias medidas para todas as areas de los botes.

Temos orgulho em inspeccionar e garantir que a produção é de acordo com a norma naval BS1088. Okoume, Hydrocore, Sapele, bem como compensados tratados contra podridao e fogo estão em estoque. Produzimos também chapas com composições em balsa, uso acústico, espuma, etc. Nossas tolerâncias são exatas e oferecemos varias medidas para todas as areas do barco.

Tenma fierté em inspe personellement et de faire en sorte que la production est réalisée selon la norme BS1088 navale. Okoumé, Hydrocore, Sapele, et traités contre Putrefaction conseils et d'incendie sont en stock. Produisent également des conseils d'administration avec une série de compositions, de mousse acoustique, etc. Notre tolerância sont Exatas et propose plusieurs mesures pour que tous les domaines de bateaux.

Tenma orgoglio em personalmente inspezzionare e di garantire che la produzione è effettuata secondo la norma BS1088. Okoumé, Hydrocore, Sapele, e dei trattati contro la putrefazione tavolette e fuoco sono in magazzino. Anche produrre tavole con una serie composizioni, schiuma acustica, ecc. Il nostro tolerância sono exatas e offre diverse misure come per tutti i settori di barche.

我们对所有海洋板都按照BS1088标准进行了检验。这些产品有奥古曼, 红杂木, 沙比利。我们也提供Powerply防腐板和防火板。所有这些板都经过劳氏认证, 这些板也是全球许多船舶制造商的指定产品。另外, 我们也提供隔音隔热功能的泡沫夹板、巴尔沙(一种轻质木材)夹板、隔音板以及蜂窝板。

CABIN SOLE OPTIONS

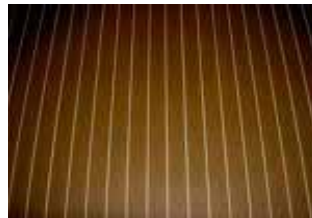

We offer a variety of cabin sole options in traditional plywood as well as scratch resistant laminates, vinyls, etc.

Teak & Holly; Teak & Black; Cherry & Holly; Cherry & Black; Mahogany & Holly; Mahogany & Black. These are just some of the available patterns. We also offer custom combinations (Wenge & brass, ash & teak, etc.) for truly unique interiors. Standard spacings of 60.7mm and 6mm available as well as 40mm and 4mm for European models.

These options are available in 2440 x 1220mm, 3050 x 1220mm and vinyl options up to 1.83m wide and 18.3m long!

Sequenced panels in select grade woods ensure consistency on a custom build, refit or production run.

Let us help you develop the best flooring option based on the desired performance or craft.

DECORATIVE PLYWOODS

Sequenced sheets, curved plywood for corners, custom laminations, lightweight cores, headliner panels, and cross-grain sheets are just a few options that allow the builder to attain the perfect result.

Custom figured panels laminated on Eurolite core and matching trim.

Tenemos varias opciones de pisos en madera solida, con trachapados, laminados, vinilo, etc. Teca, Cerezo, Caoba o otras combinaciones con ace o madera negra y en medidas normales o largas. Nuestros contrachapados decorativos pueden ser hechos con laminas en secuencia, plataformas leves, etc. Tenemos madera para sus molduras en la misma especie para perfectos resultados.

Temos varias opções de pisos em madeira solida, com pensados, laminados, vinil, etc. Teca, Cereja, Mogno ou outras combinações com madeira clara ou negra e em medidas normais ou largas. Nossos compensados decorativos podem ser feitos com lâminas em sequência, plataformas leves, etc. Temos madeira para suas molduras na mesma espécie para perfeitos resultados.

Nous avons plusieurs options de planchers de bois solide, contre-plaqué, stratifié, vinyle, etc. Teck, le cerisier, acajou ou d'autres combinaisons maple ou bois noir et mesures normale ou longue. Nos feuilles de contre-plaqué décoratif peut être fait dans l'ordre, doux plates-formes, etc. Nous avons besoin de bois pour leurs moulures à la même espèce pour des résultats parfaits.

Abbiamo diverse opzioni di solidi pavimenti in legno, compensato, laminato, vinile, ecc. Teak, ciliegio, mogano o altri combinazioni con maple o nero legno e le misure normale o lungo. I nostri fogli di compensato decorativi possono essere fatte in sequenza, mite piattaforma, ecc. Abbiamo bisogno di legno per le loro greche nella stessa specie per i risultati perfetti.

我们船舱甲板有各种传统的胶合板，也有抗耐磨的树脂复合板，高压复合板等。普通的甲板有多种不同组合：柚木，木乌，樱桃木，桃花心木等树种间的相互组合。 我们也有多种贴面板可供选择：定序板， 角落用的弯曲板，定制的高压复合板，轻质板，天花板，交叉纹贴面板等等。

TEAK DECKS, COVER BOARDS AND RAILS

We developed ST (Solid Teak) Decking panels as a way to allow boat builders and repairers to reduce down time, cost and worry.

Our panels are selected and made with vertical grain pieces throughout, eliminating individual strip lay-ups and the time it takes waiting for the caulking to dry and finish sand.

We have the most competitively priced pre-fabricated teak deck on the market. Our panels are readily available in a variety of thicknesses and sizes: 6, 9, 12 and 18mm thicknesses, 1220mm widths by 2440, 3050 and 3660mm lengths. Flexible enough to follow your deck's camber.

Our selection of teak cover and transom boards is second to none. We are constantly inspecting our cover boards at source to ensure the highest quality is being supplied.

Transom boards, Toe-kicks, rails, and other areas calling for a specific size or grain pattern can be incorporated into our selection process overseas. We regularly bring our customers' patterns to lay atop wide and long boards to make sure they are useable for their specific project.

	Teca es esencial en áreas externas de varios botes: la popa, la cubierta principal, escotilla, etc. Tenemos el conocimiento y habilidad de listones o planchas de teca ya fabricadas en varias medidas y dimensiones para facilitar la instalación. Viajamos para el exterior con los planos y medidas de nuestros clientes para obtener o fabricar piezas de alta calidad para aplicaciones específicas.
	Teca é essencial e usada nas áreas externas de vários barcos: a borda de popa, a cobertura principal, escotilha, etc. Oferecemos chapas pré-fabricadas com tiras de teca em várias medidas e dimensões para facilitar a instalação. Viajamos para o exterior com os planos e medidas de nossos clientes para obter ou fabricar peças de alta qualidade para aplicações específicas.
	Teck est indispensable et utilisé dans les domaines de extér dans plusieurs bateaux: le bord de la poupe, le couvercle principal, portes, etc. Nous vous proposons de pré-fabriqué plaques avec des bandes de teck en différentes dimensions et des mesures visant à faciliter l'installation. Voyage vers l'extérieur avec les plans et mesures pour nos clients d'obtenir ou de produire des pièces de qualité pour des applications spécifiques.
	Tek è essenziale e utilizzati nei settori extér di barche in più: il bordo di poppa, il principale coprire, boccaporti, ecc. Offriamo prefabbricati lastre con strisce di tek in varie dimensioni e misure volte a facilitare l'installazione. Viaggio verso l'esterno con i piani e le misure per i nostri clienti di ottenere o di produrre parti di alta qualità per applicazioni specifiche.
	我们的实木柚木甲板铺设方法可为您节省大量的成本，时间和精力。 我们提供最好的柚木船舱盖板及横梁板。我们持续不断地对所采购的顶板进行检验以确保产品一流的品质。如果有特殊规格要求或特别纹理要求的横梁板、贴角线、扶手以及其他部件，可以在海外进行整合打包定制加工。

NATURAL VENEERS

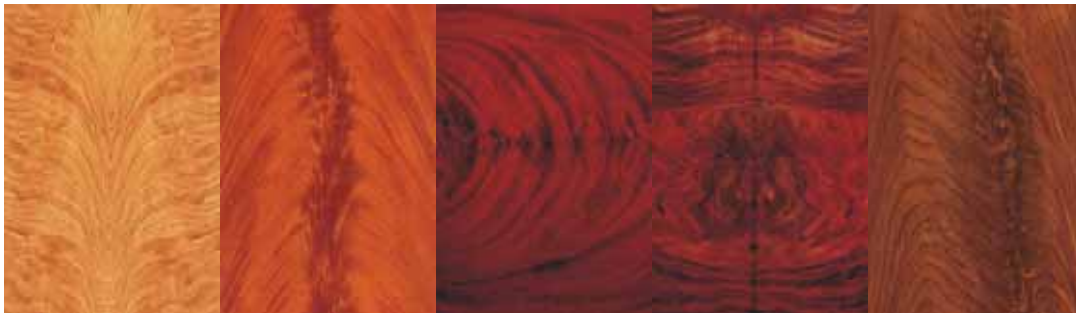

We offer a vast selection of domestic and exotic natural wood veneers in a variety of sizes and backer options. Special cuts and sequencing available.

BURLS & EXOTICS

Our Burl selection is extensive. Components are laser cut, then book matched to form the full sheet pattern. Special mosaics and other layouts are possible.

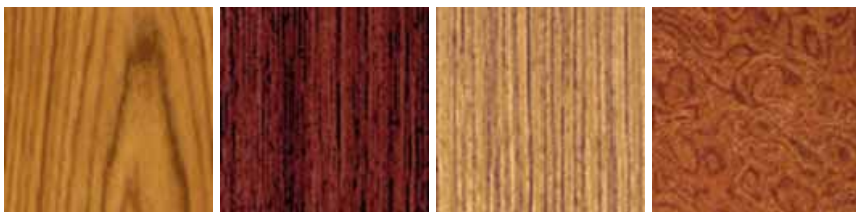

CROTCH VENEERS

Like our burls, we have the means to come up with hard to find choices for less.

EARTHWOOD ENGINEERED VENEERS

We are proud to offer our very own selection of engineered veneers in a variety of patterns. These veneers are environmentally friendly and offer a lower price and sequencing advantage. A full range of patterns and choices are readily available.

TAMBOURS & LAMINATES

Decorative tambour is available in solid wood, veneer, high pressure laminate, acrylic, vinyl, anodized aluminum and metallic materials. These flexible materials are perfect for roll top doors, pocket doors, wall coverings, counters and 'wrap around' columns. We custom manufacture flush-faced tambours with sequenced veneer.

Wood grain, metallic, solid, transparent and textured laminates are excellent ways to cover surfaces with a durable and decorative surface. Perfect for areas that are susceptible to moisture.

MARINE PLASTICS

HDPE (High Density Polyethylene) panels are used for many applications and many areas of any size craft. Table tops, hatches, rod holders, doors, instrument panels, etc. (see above)

Acrylic (Plexiglas) and Polycarbonate Sheets offer lightweight shatter and impact resistance commonly used for boat windows, windshields, doors, hatches and panels. (see below)

FIBREGLASS & RESINS

We carry an extensive selection of fiberglass and resin material for your new construction, repair or refit project. We are able to consolidate products together with your orders and ensure safe and timely delivery to the intended destination.

Tambores son disponibles en madera, metales y materiales sintéticos. Los laminados son de alta presión (HPL) y excelentes para áreas donde se mojan con facilidad. Nuestros plásticos son usados en varias aplicaciones, ventanas, puertas, componentes, etc. Tenemos también fibra de vidrio y resinas para construcción o reparo de botes. Es posible consolidar varios productos por embarque.

Tambores são disponíveis em madeira, metais e materiais sintéticos. Os laminados são de materiais sintéticos e excelentes para áreas que molham com facilidade. Nossos plásticos são usados em varias aplicações, janelas, portas, componentes, etc. Temos também fibra de vidro e resinas para construção ou reparo de barcos. É possível consolidar varios produtos em um unico embarque.

Îves fûts sont disponibles en bois, métaux et matériaux synthétique. Les stratifiés sont matériaux synthétiques et excellente pour les zones où l'eau facilement. Nos matières plastiques sont utilisées dans diverses applications, des fenêtres, portes, volets, etc. Nous sommes également en fibre de verre et de résines pour la construction ou la réparation de bateaux. Nous permettons à regrouper plusieurs produits en un seul envoi.

Îves tamburi sono disponibili in legno, metalli e materiale sintetiche. I laminati sono materiale sintetiche ed eccellente per le zone dove l'acqua facilmente. Il nostro materiale plastiche sono utilizzati in varie applicazioni, finestre, porte, componenti, ecc. Siamo anche in fibra di vetro e resine per la costruzione o la riparazione di barche. Si permette di consolidare più prodotti in un'unica spedizione.

我们有多款装饰性绷圈可供选择: 实木的, 木皮的, 高压复合板, 聚丙烯的, 聚乙烯的, 金属电镀的等等。这些产品可广泛应用于船舱的门, 墙面, 吧台及圆柱等。我们也可以采用定序板为您定制光滑的无缝绷圈。另外也提供树脂玻璃和聚碳酸酯板, HPDE板, 以及各种玻璃纤维和树脂材料。

dek-king weld

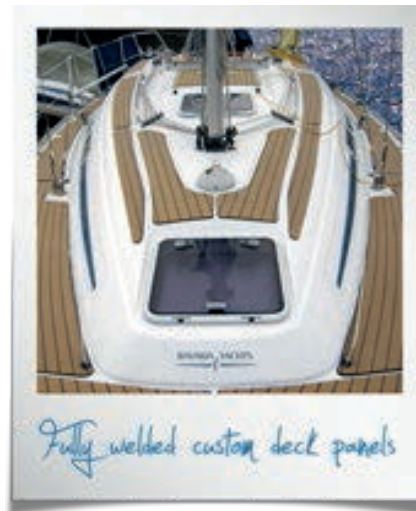

Engaging over 40 years of British manufacturing and design experience, Dek-King® Weld has been carefully developed to provide the ultimate alternative to teak.

Our decks are designed, fabricated and installed by professional teams who combine modern construction techniques with traditional hand crafted finishing to create boat decks which are virtually indistinguishable to real teak. The result is a boat deck manufactured to deliver the ultimate in terms of both performance and design.

Individual synthetic teak planks of Dek-King® are thermally joined to create fully welded, waterproof panels specifically tailored to the design requirements of boat builders, boat yards and boat owners.

The material used for Dek-King® is a UV stabilised outdoor grade PVC, it is easy to look after and doesn't lose its good looks to sunlight or harsh conditions of the marine environment.

The inbuilt graining provides a convincing wood effect and with the correct care your deck will retain its classic looks for many years to come without the risk of fading, cracking or splitting.

Less work, more play.
A real teak look *without* the maintenance

Fully welded
beautiful bespoke decks

dek-king weld

A difference you can truly see!

Dek-King® Weld is available in 6 colour combinations so as to provide you with a deck that matches your requirements.

Be it with the bright finish of a freshly laid teak deck, one that has been in use for a couple of seasons or to look like a deck that has been well weathered from the elements, we are able to supply the product to match your needs.

A real teak look *without* the maintenance

Specifications

- Virtually maintenance free – can be jet washed
- Manufactured from 100% recyclable material
- Does not turn grey – UV stabilised outdoor grade PVC
- Stain resistant – oil and wine can be removed with soap and water
- Low combustibility – fire rated to EN 13501-1: 2007
- Non-slip surface – slip resistance to BS 7976-2: 2002
- Abrasion resistance to BS EN 660-2: 1999
- Weathering tests to conditions according to RAL-GZ 716/1 (1994)

dek-king bond

The original Dek-King®, a well-established and proven system which has been sold globally for many years. Designed for DIY fabrication without the need for expensive specialist tools.

Dek-King® Bond features a tongue and groove joint and a textured finish on the base to enhance adhesion.

Dek-King® Bond profiles are stocked in our traditional teak finish with black caulking.

Adhesives

We supply two types of adhesive, Stelmax and Sealtack 750. Stelmax adhesive is used to join the strips of Dek-King® Bond together and is supplied in a 135ml tube that will bond approximately 2m² of tongue and groove joint. Sealtack 750 is a high tack MS-Polymer adhesive used to bond Dek-King® to the required surface and has a shelf life of 15 months in unopened packaging. Sealtack 750 is supplied in 600ml Sausages that will bond approximately 0.6m² of Dek-King®.

How is Dek-King® Bond supplied?

Dek-King® Bond is supplied as product only and is ideal for boat yards wishing to fabricate panels to meet their customers needs as well as D.I.Y. installations.

Accessories

Wilks also supplies Craft Knives, Blades, Dek-King® Cutters, Rollers, Adhesive Spreaders and Adhesive Guns – we're a one stop shop!
