

Envoy Technologies and ReNüTeq Partner to launch “SoLiS Mobility” EV Charge/Share Hubs Nationally

Date: 3-12-19

For Immediate Release:

Envoy Technologies and ReNüTeq partner to bring the “[SoLiS Mobility](#)” Development Strategy to the EV Charging/Share Market.

There are several corridor & urban development strategies being proposed for the implementation of electric vehicle (EV) charging infrastructure across the USA, but many fall short of improving the EV charging experience. Most are narrowly focused on “the chargers,” rather than “the charging experience” and the adjoining business models that will make them a success or failure. There is significant investment from both the private and public sectors, but ReNüTeq and Envoy, a provider of shared on-demand, community-based electric vehicles, are delivering the solution that brings together other components that will encourage the longer-term approach to improve the EV charging experience.

The “SoLiS Mobility Strategy” is planned to be accomplished through the implementation of Envoy’s advanced “[Envoy There](#)” [mobile application](#) and network technology alongside ReNüTeq’s Architecturally Thoughtful Structures kitted and deployed to sites across the USA as fully modular/expandable structures, from Two Position Canopies to full Ride Share Hubs.

SoLiS is The Design-Build Urban Development Solution for EV Charging Infrastructure Solution:

- Aesthetically Pleasing - Thoughtful Architectural Design
- Revenue Generating Facilities - Sustainable - For Profit Business - Agnostic (Anyone Can Charge)
- Sustainable Technologies - Micro-Grid - (Solar - Battery Storage - Grid tied Solution)

SoLiS Solar Canopy Solution

- Solar Generation
- Protection from the Elements
- Lighting/Surveillance/Security
- Architecturally Pleasing
- Sustainable Materials
- Renewable Technologies

Optional Amenities at SoLiS Sites:

- EV Charging
- EV (Cars/Bikes) Sharing – Through the ENVOY Platform
- Coffee/Refreshments
- Restrooms
- Shared Space – Meeting – Work Space - Lounge
- Heath Food
- Banking/Café - ATM Services
- WiFi/Cloud Access

SoLiS Market Focus:

- University Campuses
- Medical Districts
- Retail - Market Places
- Industrial – E-Commerce Facilities
- Offices Buildings/Campuses
- Hospitality - Hotels - Resorts
- Commercial Developments
- Multi-Family - Condos - Residential

SoLiS Mobility - What We Do:

- Property Development
- Design Development
- Structural Engineering
- On-Site Build Management
- Fully Kitted Supply of Structure
- Design of Integrated: Lighting/Surveillance
- Supply of full Solar and Charger System
- Management of EV Network/Partners
- Management of Site Maintenance
- SoLiS Marketing Brand Management

Quotes from Envoy:

“We believe that the built environment will have a key role in the current mobility revolution. This strategy should include well positioned infrastructure and connected mobility. This infrastructure should become part of the electric grid and community-based mode of transportation for a broad demographic of people”

Ori Sagie Co-Founder – Envoy Technologies

"We are thrilled to work with ReNüTeq to launch the "SoLiS Mobility" EV Charge/Share Platform through the provision well designed and sustain-ably built solar powered canopies and structures aimed to facilitate our solutions throughout the USA and Canada." Learn more about ENVOY's innovative ride sharing technology and solutions.

Aric Ohana Co-Founder Envoy Technologies

Quotes from ReNüTeq, Inc.:

"The ReNüTeq team and I are honored to work with Aric, Ori, and his team at ENVOY to provide the full solution for their innovative Electric Vehicle ride sharing platform." It is our passion to ensure that the solutions we provide are well designed as a forward thought, and not an afterthought to urban planning. Our solutions meet the demand for the "Ideal Charge/Share Experience" and solve the many current problems presented to the EV Charging industry.

Luke Schuette, President & CEO of ReNüTeq, Inc.

About Envoy Technologies:

Envoy Technologies, a Culver City-based provider of turnkey electric vehicle-sharing services, offers on-demand vehicles where people live, work and stay (i.e. apartments, student housing, office campuses, co-working spaces, hotels). Envoy equips real estate owners and operators with a new and innovative way to enhance the lifestyle of their tenants, members and guests by providing mobility as an amenity.
