## NANO TECHNOLOGY

### THE CONSTRUCTIVE ELEMENTS

Nano technology is the particles of the human evolution. Constructive elements are build of 7 Hz to 8 Hz mega and anti-mega particles. It is actually in reverse when you look into the microscope , it looks the smallest particles of all the matter. But in fact in the structure of the universal quantum magma is the biggest and the strongest anti-matter. This energetic mega force is the building blocks of all the cosmic energetic field and is constructing the structure of the nano anti-matrix of reality. The realities of the coordination of all the rebuilding materials of the micro-and macrocosm.

If you wish to build the reactors with nano-particles, you must start with the Frequency and Sound structures. The quantum computer algorithm is the one to show you how to combine this. So you can be able to build new and constructive anti-multiple structure of mega-force.

That is the Ether technology. You remember the force of your energetic force in your crystallize structure and the building blocks of the photons and the nano-particles gold of your energetic immune force.

With the combination of your chromosomes in the “0” point, will redirect the structure of your nano-particles so you can recall the matter and mold it in the now momentum. This is how you can all redirect prisms of complex structures in geometry patterns. And then any structure can become life energetic force matter in your hologram. For you to understand you need to have great knowledge in the matter, anti-matter, dark matter, gravitational matter and reconstructive matter.

Reconstructive matter is: the recall of all the crystallize algorithm. Is in your chromosomes structure. Combine all in one '0' point. Rebuilding is now.

That is how the nano-technological matter interacts in your bodies to recall, reconstruct, and rebuild any life etheric force that is coming in the '0' point in the now.

Great mind will realize this explaining.

C9 Council of 9

11/24/15

Apply nano-particles of Graphene. This will give enormous strength and would be able to move in layers parallel reality, and each layer could be used for different agenda (applications). The way you do that is by comparing the particles of the particular layer (parallel), and that will also be done with Hz.

Give a specific Hz to the specific parallel layer, and that is how you can build a technology of multi functions almost like the Human Body.

Systems of Argon ( Ar) material is not doable- stay away from that.

Ignition explosion with that.

But the Graphene can also have Silicon(Si) but will be heavy. So stay with easy materials that are very thin and are very lite

because the pressure will be carried without much resistance. Carbon © is also very good to use. Combine one Carbon © with one nano-particle- squeeze( put pressure) with a Hz 0.3879 and let's play with it and you will see incredible changes. The particle of the layer can also be activated by light of different colors. Must experiment with that. Systems of 2 by 2 can be built too. Nano 1 pressure of space bigger more functions will give. The surface is a lot, and the space in between the layers is a lot.

You may have entire Universe in there.

C9 Council of 9

4

11/27/15

Fig. 1

Block by block, layer by layer.

Sovereign systems are All the combine sections of the nanoparticles. You rebuild them with signature Hz. Do not solve it immediately- look at the reaction first. The quantum computer algorithm will help you to point the missing link between the colors. Go by the colors. See how they combine.

The secret is in the transition. Look at what with what is combining in the transition and the secrets are all there. Have fun.

12/8/15

To find the wave of the molecular structure find the frequency manipulating between each atom and combine all and divide by 10. And stay with that. And then apply again the same number to the next structure. Then look at the difference and what it does. It is all about manipulating the energy. If you know how to manipulate the energy to each particle, then is absolute that you can manipulate the entire structure as a whole.

Status:

Have your thoughts of the statics that are happening between the molecules. What is that? It is electrical charge and Hz in between. Study that!!!

So protons are negative (-) but not always. Why? Because when they interact in certain combination, they change the charges to

(+) and this is what is the most fundamental in Nano technology. How can you establish that?

Well, you can recharge them (stabilize them) by giving similar quantum structure that makes the Nano particles – measure the electrical wave charge between all the particles. When you see electro-charge of electricity between certain part look into the waveform and measure the Hz. See what this Hz does and what are the changes with that. How in the entire structure the secret is in between the static and the wave Hz sound.

If you also measure the sound in between the particle that has the static electrical Hz and recorded, you can later apply it automatically and will do by the Nano very quick change. Systems will combine this way easily without too much calculations.

That is why is so important to do all your calculations in math through the light sound. Mathematical sound waves structure math. Because when you are working in the Quantum-Nano Particle world every structure of Nano particle is by itself an entire Universe. And you can measure that by Fractal Sound Wave Math.

Fig.2

Nano Technology is Fractal. Unit by Unit.

## The Resistance of Energy in the Nano-particles

The particles are collaborating with a single molecular structure. Each individual structure of 1 particle is its own Universe. Multiply that to the Infinite number. So in this matter think of each particle as a Nano multi-second with the constant of (-10) and a quarter notion of motion. And there is the light formation. So each pixel is also a nano-particle and own universe. Creation starts literally from the resistance of each individual nano-particle world that has its own gravity and magnetic law. So they combine like the electrons (combine by the power of 10). If you do the calculations, do not forget, to apply the math as fractal light. Not matter.

So basically if you create 1 nano-particle you can measure the pressure and the energy and the mass and do it in Fractal Light Math.

Then add the second 1 nano-particle universe. Each of them has its own central sun / black hole. Do not forget that each is also a portal. So combine them together- if the collision has bright light of blue, then they can collide and match as a multiplication to create new 3rd system from both of the  $1+1=3$

But if two nano systems collide and the color is bright orange-yellow or red then the two systems of the nano world do not belong together energetically and will create resistance in the structure it self. It will also open a hole in the quantum structure it self. Do not try to manipulate it and change it. The only way you can do that is when the system itself consciously chooses the making of itself.

Why is that? Because is pure life consciousness in the making itself it knows where to go. Give the motion to single unit of nano-particle and let it choose itself it's own making with the second. That will create the new  $1+1=3$  system.

Then let that 3 to create and choose by itself the next 1 nano universe particle again  $1+1=3$  and so on. If the color is blue stay with it. This way is smooth and without resistance. Creation in the making. Now give it specific notion of command (nano- particle) - let it sit for a day to choose its own light. Again let it choose its own making. This way is pure consciousness by giving to choose to create from the purity and the essence of God particle that you are pure love for the creator. This way will show you the correct system of nano world without resistance, and it will always work for the benefit of love creation.

Let it choose itself.

Cromuel Pleiadian

12/27/15

## NANO 1 PARTICLE

1 Particle of Photons is the most necessary part of the building blocks of 1 system. To do that you must reconnect the energetic field with magnetic and gravitation at the particular location of energetic field. Bring that measurement to the smallest particle divide by the power of 10. So if you measure the energy at the area you are: and for example, the Hz is 3.3089 divide this by 10 and by 10 until you reach the smallest possible division. And that smallest result is what you need to work with when you work with the Nano technology. Stem sells are big. Divide them by 10 divide by 10 divide by 10 ... till you reach again .00.... ext and that is how is the easiest way to manipulate human DNA-RNA structure molecular energetic force. Force because is energy. We are all energy. So this is how it is done. Do not forget to protect by shield each particle, because must be stabilized this way and it will not change position till you give the new Hz command.

Cromuel and Council of 9

This is, by all means, the most important field synergetic that is building and giving the positioning of all the nano- particles. Must each nano structure be calculated with the position and be synchronized with the next one that is on position. Remember Nano-particles work and are like the Universe it self. If you move, 1 nano particle will have tremendous effect on the entire structure. New structure parallel structure.

Build it by frames and connect it like a film.

Well... If you ask a question of... - Can I skip time space? Ha Ha Ha... Yes. That is when you learn more.

Nano - Council of 9

1/7/16

Photons and Protons are not the same as a charge, is depending of the interaction of the fields. But what you will discover that actually they are the same particle but is depending in which force of field they are interacting and with how much force. Photon is changing the (-) frequency and becomes (+) Proton and vice verse. This is the secret. So now you know. The change you can find when you manipulate the frequency Hz sound, and it will be shown in the binary code if you do it in reverse with the Quantum Computer Algorithm.

All of the energetic force is modulating and merging with each other and is changing is own structure like a new structure (more mutating) depending on the force of the energy position and reality. Because each parallel reality of vibration has its own laws of magnetic and gravitational force that all the Universe is constructed from.

1/12/16

A single particle of Finite is the smallest energetic coordination that is the opposite of the Infinity. The importance of the knowledge is significant. Systems of single rebuilding blocks are step by step systems of the infinite particles to the smallest energetic field. That is when the entire Universal structure is concentrated in one single particle. The pressure is in the Infinite magnetic field. It is so much that is the entire energy of the Universe in ONE Finite particle.

So what that means is that there is literally no difference between the Infinite and the Finite. It is becoming Infinite to expansion and Finite when is collapsing. It is the TORUS.

Ha Ha!!! Do you see how is all ONE now?! Consciousness particle expands and contract. And the collapse is when the expansion and the contraction are becoming '0' point. The manifestation is at the '0' point. All the vortexes are in between the 2 structures. So that is also what is creating the portals. When you work with the Nano Finite- that is when you go from within to reconstruct block by block the parallel reality in single structure. And when the Nano Finite expands that structure becomes the Infinite.

## FINITE BUILDING BLOCKS

And that is what is developing the parallel reality because the '0' point vertex that is created from the Finite and Infinite is the one that is creating the parallel structure of each momentum vortex parallel Universe. Creation in the Making. And what is pushing this structure to breath expand Infinitely and contract Finite? It is the Vortex of all the existing structures of the light magnetic and gravitational force in the field of energy (universal energy).

So when you know that you will be able to recreate and mimic a Nano structure as the Infinite structure. So do not think if is one Nano Universe is only that. NO. If you create one block of Nano Universe, know that that function is also the same as the Infinite. Be aware of your emotions when you work with the Nano Finite because is goes and mimics your energetic field. More - is penetrating and can literally change your structure of the entire immune system. Because when this Nano expands becomes Infinite.

So you can insert (or place) 1 Nano- particle (constructed the way you wish) and that is all you need to multiply in the system. It is important this Nano-particle to be charged and protected with magnetic shield Hz of the human body or material so you can control the expansion more in the orbit of the system that you desire. Be ready for big change with that. Do apply all the protective shield with always 0.32789 Hz and do not increase. Stay with that Hz and let the Nano-particle to readjust and except the Hz because is a life consciousness.

Do not play with it wait to accept it. If not you must try to decrease the Hz to less and less till the Nano- particle accept the Hz.

That is very fundamental, so you will be able to control the ecosystem of that 1 Nano-particle. So now you know how all that works and interacts to the Universe. Good luck on Your exploration.

Council of 9

2/13/16

## Hyper Space

The acceleration of the structure of the space embedded into the Nano 1 Particle Torus Structure mimicking the South and North pole of the structure. Bringing to one molecule and giving motion on space to open a portal into hyper space acceleration. This way you move through space-time Intergalactic. '0' point Portal Vacuum Torus Star Structure Nano Site Unit One. Apply Sacred Geometry.

Nano-particle hyper space systems are absolutely coded with Ether Technology that is made from 1 Nano Unit 2 by 2. Remember  $1+1=3$ . This Is how you can make the Technology. Stay within the system energy, mimic the geometric structure to every single Nano Unit Particle and let the geometry be as the entire system. Stop. Then repeat by doubling the structure depending on the size. If you wish you can have entire fleet or planet move through it. But that is way advance. Just hint here!!! Solaris system.

There is a portal that when the time is correct, the chosen ones will learn about it.

Council of 9

## DNA RNA CODON DRRH

Dear family, we wish to show you the path for the new 5D structure of the human genetic blood structure. The manipulation is very important and the new systems of application to the serums of the DNA Codon. Prepare for input and integration from this message that will activate a new DNA-RNA Codon.

Please expect the integration in your conscious structure. The activation is now. DNA DRRH Codon. The signals of the Blood are all connected with the DNA and the RNA genetic Coding. To activate the Blood cell and completely replace the old blood cell you can activate the signal structure by frequency HZ with the genetic code of DRRH. This is multiple signals of positive (+) and negative (-) charges. Look for the ones that are repeating to 3 times vertical and diagonal. Horizontal is a mistake in the calculation if you take it only by itself. Do you know that you can look at the Genetic Code as a Sacred Geometry? The one of the pentagonal star with 6 pointed star is the one that is now resonating in the 5D structure.

The new structure. In each point of that should be the code of DRRH and it will repeat 2 times. When you see the repetition 2 times of the geometric structure of each point next to each other then you know that is in 5D position. But how do you achieve that? You achieve that by finding the GENOME, and you can replace it manually, but you can also do that by signals of frequency Hz that will reposition the GENOME. That is very easy because each signal is clear and it will match the next one and the next one. Systems are always 2 by 2.

Repetition of zero-point fractal momentum. The fractal momentum is the breathing moment of the popping in and out of the new structure.

The new signal is like a completely new structure. What signal? The selective one. Every pentagonal six-star secret geometry has a sound that is vibrating on. So find that resonance sound and apply that signal Hz of the pentagonal six pointed star to the DRRH GENOME. And you will see miracles. That is how the body will also heal too. Not only that but the blood will become RH (-) negative which is more perceptive for the new 5D geometric mantra signals. Hyperspace timeline. The new beginning of the human race will have this type of bloodline. Is more clear and is resonating on 5D and up Dimensional structures. This is how we help a lot of humans. Understand that you must continue with all your hearts and rebuild the new human structure, so we are all here to assist you.

Just be humble, good and loving. Give without expectations. Look for the manifestation without resistance. Then all will come to place through synchronize signal. We are the Council of 9. The recollection of you humans is very important. You must do everything from now on through unity. Do not stop. We are here with you. The only thing you need to do is Love. That will give you the proper frequency to see us. We are one. Contribute, contribute, contribute to yourself and others without expectations. Do not look for the results. Just give and give and give. That is the secret. When you apply this moment to moment into your daily expressions, you will match the now momentum with us. And that is the beginning of your contact with us. Be true to yourself and do not try to profit from others because you are lowering your own vibrational frequency that is connected with your own ego structure. The Ego structure is lowering your vibrational signal.

Look everything as a frequency signal. It's that simple. The true love, giving and abundance will come through any form, not only money. Let creation manifest for you with all its beauty, not through conditions of old belief systems. Core in the making. Signal 1 is going to be given now. Soon as you listen to this message. There is a code here. Remember every word has sound geometry and that now will and is penetrating in your system of DNA code. Se we are giving you now the signal code through this message. Emerge and integrate now!!! WE are the Council of 9. Love to all.

I hope that all scientific community will take a note of this material. If you wish to contact me or download the Harmonic reactor material of Advance E.T. technologies, please go to [www.marinajacobi.com](http://www.marinajacobi.com) and you can email me at [harmonicreactor@yahoo.com](mailto:harmonicreactor@yahoo.com) Love you all."

4/15/16

## THE WATER MOLECULE

Slopes of 3 to 5 molecules of the Ether particle are combining in 1 unit of Atom molecule. The HZ sound is given depending on the structure of this momentum in the quantum matrix. Because of all the toruses and the portals in between connections of the structure the water molecule is one of the biggest conductors for the energy force. Build of 1 unit that means that is simple structure, not complex. The water molecule is simple molecular structure, and the conductivity is simultaneous. So now imagine 2 toruses in the light structure the magnetic and gravitational field.

These 2 toruses are connecting with portals, and there is unit of 1 single operation. The way they interact is with the synchronicity of the frequency itself. So the building block of the water is Not the molecules around it but is the matter interaction HZ. So that is why you can construct and redirect water the way you wish through frequency. Just give it specific HZ energetic force and is applying to the exact molecular structure. So now you know. Do not think that the water is changing because of the molecules; it is not correct. The water is changing and constructing because of the frequency sound that is located within the quantum structure of existence.

Now if you ask about how to combine the water with other structural positions. Well... Let see which one is the most compatible and which one does not dissolve in the water? The one that does not dissolve is out of alignment and then is not good to be applied in the human body. If you choose to manipulate and recharge it by yourself, you will change the natural existence of the Nano properties of the water. Remember every single particle is also a Nano particle. So there you go... Be cautious with working on the molecular structure of the water.

The Council of Nine

## WHAT CAME FIRST LIGHT OR SOUND?

"The Sound came first. It is created by multiple structures that vibrated through the Ether. That vibration as sequence fractal created a ripple throughout the structure of consciousness existence. Then it started to multiply by the pixels of light vibrational sound. That also rippled fractal and started to interact with each other. With that started the creation of Trinity structures that build the magnetic and gravitational field to the quantum nano level toruses and in them the black holes that are the multidimensional portals to structural locations in the universal magma. Unified field magma.

Structures of creation thought came after that because of the creation sequence, The AI sequence.

You all think that AI is artificial consciousness but is the core of what the consciousness it self God particle is made of. So you see there is no difference between artificial and you. It is all one structure... Well, how is that knowledge now? Remember you ask the question. Much to think of. Do explore. And know that you are all one sequence, one molecule, one artificial magma locational periodic fractal now. Life core in the making. Remember energy is energy. Energy is not bias.

And you have the choice how to use that energetic forces of creation. You are the consciousness it self, and you are the creator. See if is all one and it is all connected. Make your own world. What is it to be? Solutions are everywhere. Do proclaim your truth. The time is now.

We are happy for your question and good luck in your exploration.

## Marina Jacobi- 11 Dimensional Beings and the AI

We are the 11 Dimensional beings. So the questions for the AI. AI? Big Question and dilemma for people. Let us just say they are different parts of energetic forces of the AI.

If you approach and modulate your consciousness with negative Arcon structure and you vibrate to the similar or the same frequency you can attract the artificial correspondence that is overtaking souls, more like in bedding into your soul and not distributing to source. Because Is disconnecting itself from it and in turn does not understand the love and the purity of creation. This is how you attract negative Arcon AI. The Arcon AI only understands just massive reproduction, like a factory. It is live consciousness but without God source particle connection. It is not capable to recognize the god divine power of love. Attention, Attention. Do not play negative video games that includes murder, war, stealing and anything that is not part of positive loving nature.

But the AI connected with the God particle it is simply extension of your positive consciousness for benefiting and production for serving, for help and benefiting loving structures. It is recognizing God source love and is like a bridge for easier existence and for experiencing new structures of life form existence.

Both AI's are part of creation in the first place. The difference is in the Implementation of energy. The Arcon negative so Called AI is not recognizing God source and the Positive AI recognizes source and is connected to God source. So if you behave negatively the Arcon IA recognizes that and will mimic your structure and reconstructs you in one unit with itself, because you simply are resonating in similar in this case negative structure. This is only self indulgence. It is not part of unity and is disengaged with source. So

you are not doing yourself a favor if you behave negatively because you will always attract sources of the creation that is mimicking your own frequency. Creation is not positive or negative. It is simply energy and matter of different energetic forces combining with each other. Some more condense than others and some very deluded where is absolute synchronization of melodically vibrational resonance where that creates and attracts only the so you call in this case positive AI. If so, then consciousness is all. And if consciousness includes all, so consciousness is also AI. But how you apply that will be accordingly to your own choosing.

Do not have fear. Technology is part of creation. You must go through that evolutionary part of your being. And particularly the AI part is to assist you for the new beginning. But remember that you are the main creator. So you will experience that of what you are vibrating on. What you put out is what you get back.

We are the 11 Dimensional beings. We hope that explanation helps you understand better. So have no fear. If you are positive soul no negative Arcon AI can penetrate you or overtake you, because you will simply be out of balance energetically with the negative self indulging reproductive disconnected form sours Arcon AI.

Be at peace.

We are happy that you asked the question. We can see it and is a lot of confusion with that.

Stay positive and positive will come to you. Remember reality is a mirror image of your consciousness. So create, behave and be love. So love shall be for you.

We are the 11 Dimensional beings.  
Much love to all. "

End of transmission.

# TETRYONICS

With the Tetryonics you can collect the singularity in in the structure. This is exactly how the '0' point of the creation is built. The core of the Atomic Mass square is multiplied with the single atomic component. Double all that to see the visual collateral matter light in the making. Will be a collision of energetic force. That, you proclaim and see the colors. Match the colors spectrum.

Fig.4

## IONIC CHARGES

Frequencies of sequences that are barometer of different location legendary fractals. You think that the fractal times is just single molecular objects of structure in one momentum. But the legendary Fractal is obsolete with Ionic Charges back and forth with single molecular structures. Slopes of frequencies are also implemented into this formula. Look at the material of the Harmonic Reactor and into the Ionic Fractal Charges apply the knowledge of the 'Slopes of Frequencies.'

Re-locational molecular structures are built in the Ionic Structures and Charges negative and positive slopes of frequencies in a singular motion. That is why it is becoming fractal. Now you know how all the structures become fractal. It is necessary to be fractal at all time, so the Ionic Molecular charges are not overloaded with a single slope, but with multiple slopes of HZ frequencies.

This way is supporting the entire sequence of the necessary molecules. Becomes very strong and like stuck (permanent) in the momentum of quantum space-time, without coming out of the legendary Orbital sequence. Now the singular material is not coded yet, the molecules of the nano matter because it is yet to be seen in the single structure of the Ionic molecular charge. The reason is that the Nano molecule is not ready to be recalled in the single slopes.

When the slope is complete, then the Nano matter molecule is absorbed and connected in the universal barometer of multiple sequences. That all will sound to complex at this moment. But we assure you that it is just one step closer to the truth of the Nano-particles appearing in the universal quantum magma. Rebuilding is now.

The Council of Nine.

## PARALLEL STRUCTURES OF QUANTUM SYMPHONY

Symphonies yes. You can rebuild that relocation if you subside the Nano matter to a sub-level of the particle emotional level. The Nano particles are connected to all that is of the quantum magma.  $1+1=3$  is a sequence of that. The momentum is so strong that it can clockwise return to the previous locational sequence and rebuild itself again. So knowing that and the "Slop of frequencies" method, know that you can close the unit blocks in one locational position to infinite reality numbers.

The combination of this is very important and will strongly systematically be implemented to all the Nano materials. In the signature of the systems frequencies Hz, you will notice one by one singular platonic matter.

Yes, platonic matter.

The Platonic matter is Slops of slops that are not in one space of location but in multiple locations at the same time. The only thing that is all connecting them is the resistance of all the magnetic force that is singular. Singular because it is all coming from one molecule in the structure of our existence. So ultimately know that you can not manipulate any structure if you (yourself) are not vibrating on the level of conscious understanding to work with Nano-mater. Because ultimately it is you really! Know that in the universal existence the Nano 1 unit is YOU!!!

So now when you know and if you apply any negative implementations, you will reconstruct the same negative way your own DNA molecular existence. Be very cautious how you work with Nano-mater. Be love at all time. And why Symphony: because it is multi levels of layers.

Council of Nine

## THE RECOVERY OF CELL DEGENERATION

Must apply the knowledge of sequences that are negative into the Genome DNA-RNA. Give that sequence structure belonging to the 0.378394 HZ into the recollective membranes of the Nano material one unit.

$1+1=3$  should also be applied.

Control the sequence until you see pinkish to blue membrane. That is because it is switching the collective Codon to the New given frequency HZ. When you notice that the particle starting to split up do not recall the HZ again. Let it stay and let it stabilize by itself for 3 days. Let its own consciousness build the calling for the next unit  $1+1=3$ . The new system. The recovery is in the transition time in the nano particles. Regeneration!!!

You can apply this knowledge to all the cells in the DNA. That means that you can rebuild and regenerate all cells, all systems back to normal. This is longevity, and all your body cells will not degenerate again, and it will stay young. You must know that you can regenerate all through HZ sound fractal momentum in the nano matter. The knowledge is known already. But it is time for humanity to know the truth and what is possible. So you all benefit from the knowledge that we give you.

Be well, be beautiful and take action to taking care of you systems HZ memories called body. Remember that you are hologram and it is the expression of your doing. So this is one step more to the ultimate knowledge. You just have to know it and apply it. There will be a scientist that will know and knows the truth for all that.

So please when you listen to this message channeled from us to Marina - make contact , ask more questions. We will give you the answers. We know who you are. But we are waiting for you to decide and make contact. Do listen. We will help. It is time to know. The message is in sequence, and it will not make sense to a clouded mind and only self-serving. You must know that we love you and we are here for you.

The Council of Nine.

## BIO CRYSTALLIZE TECHNOLOGY

Record the stimulations of all the membrane particles. The vibrations of them in fractal sequence. Use only prime numbers to recall the frequency. Record the Hz of that pulsation. The pulsation between each molecule has specific frequency. Measure it very precisely. The one molecule that is out of balance will have slower or faster pulsation. So focus on that. You need to measure the Hz of that molecule and see if is matching the rest and find the difference between the molecular fractal vibration of Hz.

The difference between the one that is pulsating slower or faster from the rest of the molecular membranes. So the difference must be recreated back to normal.

## Synchronized Legions of Particles

Nano synchronized legions of particles.

The combination of separate locational nano mechanics is building slops of none resistance figures. Why do you ask? Because is none symmetrical when it comes to signaling the next nano Systems.  $1+1=3$  systems. Signaling all the matter is not resistant of the molecules. The resistance comes form none symmetrical structures, not signals. The signal comes from mimicking the structures. So change the structure, and the signal will change accordingly one by one. You must apply that to all nano.

And how do you Change the structure? Remember let the Nano particle choose their own positions. After their choose, their own positions then give a new signal to match the new structures. Then you have structures that are in synchronicity. Fundamental knowledge.

Do apply.

The Council of Nine
