

COLD PAD OPENS THE BRAZILIAN MARKET TO INNOVATIVE OUTFITTING REPAIRS

10 April 2019 – **COLD PAD** is proud to announce the first successful installation of C-CLAW™ offshore Brazil. The operation was carried out on a BW Offshore-owned asset in March 2019, for the repair of a corroded pipe support. No hot works were implemented. The FPSO Technical & Maintenance Manager stated that *“the operation went well and the offshore people liked the ergonomics of the tool”*. He stressed that *“C-CLAW™ is a real gamechanger for the offshore industry : the work is safer and more cost effective”*.

C-CLAW™ is a non-intrusive, heavy-duty fastener with a process-controlled installation. C-CLAW™ offers a quick, reliable and durable fastening solution for FPSO outfitting, maintenance and modification operations for cable trays, pipe supports, skids, handrails, ladders and more....

COLD PAD is a French company that provides innovative solutions designed to enhance the reliability of structural bonding for the Offshore industry and especially FPSOs (maintenance and life extension). COLDPAD solutions include FPSO hull & deck repairs through cold work techniques allowing to maximize production uptime.

Safe, Reliable & Durable
