ABOUT THE SPEAKER:
Barbara Furry, RN-BC, MS, CCRN, FAHA, is nationally recognized for quality healthcare education. With thirty years of critical care nursing experience, Barbara shares her passion for teaching and advances in cardiac care to all areas of healthcare education. She holds a Master’s of Science degree in Health from Cambridge State University. Barbara reaches beyond the traditional functions of medical education to be a catalyst, advocate for, and a provider of education that promotes change, development and improvement in the nurses’, physicians’ and allied healthcare practitioners’ delivery of patient care.

CREDIT: 14 contact hours
This two-day course is designed to provide the critical care health care provider with a review of the AACN core curriculum.

- Provided in a lecture format, we will review anatomy and physiology, physical assessment including hemodynamics and utilization of invasive assessment tools also pathophysiology in a systems approach.
- Discussion topics include gastrointestinal, psychological and legal aspects of care.
- This review is not an introduction to the environments of critical care or telemetry, but a comprehensive update for the professional already in practice at the critical care or tele bedside preparing for the CCRN or PCCN examination

Please contact us for further information.

CCRN REVIEW Objectives:
• Offer the experienced critical care nurse a review of the physiological aspects of adult critical care nursing.
• Assist nurses in preparing for the CCRN certification exam by understanding the physiological principles that govern the delivery of care to the critically ill adult.
• Discuss the physiology governing function of the major systems along with the Synergy Model and ethics/professional care.
• Apply physiological principles to improve judgment and understanding of the management of the critically ill adult.
