

Abib Update: Thursday March 7, 2019

Hi Folks,

What a difference a day makes in the Land when They decide to flip the switch from winter to summer. It is dramatic in all the signs recorded in scripture.

Yesterday we saw a total of a dozen white storks in the Jordan Valley migrating north. Today we had thousands of them overhead as they were trying to pick up the thermals so they could soar tirelessly. We will be looking for the crescent tonight and then hosting the zoom meeting at 7 PM Israel time and 12 PM eastern US time.

Next, we have a group making the high attempt to start their funnel.

We will be putting a summation together this Sunday once we make it home.
Happy New Year (tonight or tomorrow) to those who follow the criteria which we do.

Brian and Chanse.
