Subject: Non-GMO declaration

Dear customer,

we inform you that all vegetable seed varieties, currently released for being tested or marketed by our company, have been developed in Italy, through conventional breeding methods, without using genetic modification techniques as defined in Directive 2001/18/EC on the deliberate release into the environment of genetically modified organisms.

The methods used for breeding and producing our varieties include procedures aimed at obtaining high purity standards and avoiding the presence of off-types and genetically modified organism.

This statement is for all the varieties marketed before and throughout 2020.

If, in the future, we intend to change our policy regarding genetically modified varieties (GMO's), we will keep you informed in advance.

Sincerely

January 2020

La Semiorto Sementi s.r.l.
