- Configure on the network
- Configure printer(s) on the new computer

#### **SOFTWARE and PASSWORDS MUST BE PROVIDED**

\*additional time for specialized software installation, tracking down passwords or instruction will be billed additionally at \$150 an hour

### **Additional Tips**

#### **Software**

If you have older software ie: old Quicken or Quickbooks, AutoCad, Office 2007 or older, they may not work on your new computer. Check with the manufacturer for system requirements/compatibility. You may need to upgrade the software.

#### **Printers**

If you have an older printer it may not work with your new computer. New all-in-one printers are very affordable. It may be more cost effective to replace your old printer with a new one.

#### **Monitors**

Check the video connections on your new desktop or laptop to ensure they are compatible with the monitor(s) you have or are replacing. There are 3 common types of video connections. You may need to purchase an adapter to get your monitor(s) connected.

## **New Computer Setup Information Needed**

- Password for your old computer
- Printer brand and model
- Main email address and password
- Do you pay for antivirus software?  
Yes – provide your account username and password or the installation disc  
No – We recommend Vipre Advanced Security for Home, it's \$43.99/year.
- Do you pay for online backup?  
Yes – provide your account username and password  
No – We can sign you up for BackBlaze. It's \$60/year, unlimited data.
- Do you use Office?  
If yes, we need your Office installation discs or your Microsoft account username and password.
- Do you need to purchase Office? We can help you choose the right version.
- Do you use Outlook to check your email?  
If yes, we need the email address and password you would like configured.
- Do you have any other software that needs to be installed? (Quickbooks, Quicken, Photoshop, etc.)  
Provide your account username and password or the installation discs.
- Do you want us to recycle your old computer?

## What to look for in a new PC

### **New:**

New not refurbished

### **Brands we like:**

Lenovo  
HP  
Acer  
Asus  
Dell desktops  
higher end Dell laptops

### **Processor:**

8th generation i5

If you are a gamer, audio or video editor, use Autocad or graphic design software, you will need an 8th generation i7 processor.

Avoid AMD, Intel Celeron or Intel Pentium processors. These computers will be less expensive but will be slower and need to be replaced sooner.

### **RAM:**

8 GB or more

### **Storage:**

256GB or larger Solid State Drive

BE CAREFUL! They are smaller than a traditional hard drive. Make sure the SSD that comes in the computer is big enough to store your data. If you have a lot of pictures or music, you will likely need a larger size.

### **Operating System:**

Windows 10
