

My experience in Naples was one of the best experiences I have ever had.

At the beginning first I was a bit frightened because I was going to a family whom I did not know anything about, but as soon as I met them I realized that they were my second family and that they treated me as such.

The person who welcomed me to (today my friend) is one of the people with the best heart I know and who I will meet.

My colleagues made the experience exceed my expectations.

In summary my experience both outside and inside the institute was incredible.
