**SkillsUSA Membership**

We encourage everyone to try and take advantage of the November Early-Bird Deadline for membership.

We do have some changes. For those of you that have visited the Website, you will notice some membership deadlines that were not previously there. These were enacted to make sure that we are serving the students of SkillsUSA Ohio to the best of our ability by providing high quality contests.
So, that being said, the membership deadline for ALL CONTESTANTS competing at the REGIONAL LEVEL is January 28, 2019.

Straight to State Competitors will still have until the March 1 Deadline.

Last year the CBI Board in conjunction with SkillsUSA Ohio voted to abolish the affiliation program.

For more information about the new program for CBI students and Middle School students, please email Jackie at skillsusaohiojw@gmail.com.

During this time of transition, we have been reviewing all of our regulatory and procedural documents. You will see new Guidelines books posted for all levels of our membership (High School, Post-Secondary and Middle School). Be on the look-out for these documents as they will be your guide for the SkillsUSA Ohio Program.

We are looking for industry partners willing to coordinate these contests. Please contact Jackie Walker at skillsusaohiojw@gmail.com if you have anyone that may be interested.

**Resources for New Perkins Law Available**

President Trump recently signed into law H.R. 2353, the Strengthening Career and Technical Education for the 21st Century Act, the bill that reauthorizes the 2006 Carl D. Perkins Career and Technical Education
Act. We now have a new law governing the federal investment in CTE. Our friends at the Association for Career and Technical Education (ACTE) and Advance CTE have done a great job of sharing information and resources as the new legislation moved forward.

Now that the dust is settling, you may wonder what is different. ACTE has provided the following resources for Perkins, including a recorded webinar that highlights changes from prior legislation, definitions of key terms, accountability indicators, state and local planning, and more. ACTE resources are at these links:

- Perkins V recorded webinar Aug. 2: [https://youtu.be/hBlvzHqYyg](https://youtu.be/hBlvzHqYyg)
- Perkins V resources can be found on Advance CTE's Perkins webpage: [https://careertech.org/Perkins](https://careertech.org/Perkins)
- Career and technical education communications tools and resources can be found on Advance CTE's website here: [https://careertech.org/recruitmentstrategies](https://careertech.org/recruitmentstrategies)

If you have questions on the new law after viewing these materials, email publicpolicy@actonline.org with the subject line “Perkins V Question.”

**Do You Have a Constitution?**

Make the 2018-2019 school year the year for creating a chapter that's built on a rock-solid foundation. Whether you've had an active chapter for years or your chapter is just developing, now is the time to ensure success!

To do that, take a look at the steps below to apply for a chapter charter and create a chapter constitution. Even if you have been operating as a chapter for a number of years, it's not too late to create your constitution and formalize your structure. Don't delay on this step, and be sure to get your members involved in the process. It is a great way to learn about the organization.

- If you are a new chapter, it is imperative that you submit a local constitution and chapter charter to your state SkillsUSA director. Once the state SkillsUSA director has accepted your local constitution and chapter charter, your school will be included among the registered users on the SkillsUSA registration site.
- All chapters must have a constitution. Use the Suggested Local Constitution as a guideline, and ensure that you update it with
school-specific information. Your chapter can always amend the constitution in the future if there is ever a need.

- Your chapter is official once your state SkillsUSA director has accepted your charter and constitution. You are ready to move forward to take advantage of local, state and national opportunities that await you and your students.

Posters, Brochures, Lesson Plans and More - Get Your Membership Kits!

Get outfitted for a new school year with posters, brochures, lesson plans and whole lot more that comes packed into your SkillsUSA membership kit. Kits have been mailed to all chapters that affiliated with SkillsUSA last year, but if you haven't received yours, then call toll-free 844-875-4557 to request a copy.

There are three unique membership kits, each designed for a specific market: middle school, high school or college/postsecondary. Each kit contains three posters, a brochure, membership cards and a chapter management guide. The guide is key to your success and includes information on establishing a chapter, engaging students in chapter activities, tools for recruitment, lesson plans, programs, scholarship and recognition opportunities, and information on educational resources.

All of the membership materials can also be downloaded at: [www.skillsusa.org/membership-resources/advisors/membership-kit/](http://www.skillsusa.org/membership-resources/advisors/membership-kit/)
Manufacturing Day is a celebration of modern manufacturing meant to inspire the next generation of manufacturers. Manufacturing Day occurs on the first Friday in October. While Manufacturing Day is officially Oct. 5, SkillsUSA chapters can plan events on any date in October that works best. SkillsUSA chapters are asked to share Manufacturing Day photos and stories with communications specialist Hayley Uffelman atuffelman@skillsusa.org. For resources, or to find events in your area, go to: www.mfgday.com.

Attention Teachers and School Administrators!

The American Bankers Association Foundation wants to encourage financial responsibility among your students. The "Lights, Camera, Save!" video contest calls on students to educate themselves and their peers about saving and using money wisely.

They're looking for creative, innovative concepts - your students' imaginations are the only limit to coming up with unique savings scenarios. Winning videos will be posted on YouTube and viewed by people across the globe.

The contest is free and open to all students age 13-18, with the videos of local winners moving on to the national competition. The entry period is Oct. 1-Dec. 3. The top three national winners will receive awards of $1,000, $2,500 or $5,000 to fund their saving goals. Equally rewarding, if one of your students is a top-three national winner, your school will win a scholarship to attend the Jump$tart National Educator Conference. Winners will be announced in March.

Visit www.LightsCameraSave.com for additional contest information and to locate a participating bank in your area.

Free Occupational Safety Resources Available for Postsecondary Educators
Every day, two to three workers die on construction sites in the United States. New and young workers are at high risk for injury. But through quality safety and health education, career and technical programs can help keep future workers safe.

Free resources are now available at: http://bit.ly/cte-guide. These will help postsecondary instructors and administrators to:

- Assess your program, using the online assessment tools, to determine how it's doing in the areas of Safety and Health Management Systems, Instructor Qualifications and Support, Effective Teaching and Learning, and Offsite Learning
• Learn how to better prepare your students to work safely in changing, hazard-filled environments

• Spread the news about these resources by downloading an informational handout that can be used at your meetings

SkillsUSA has advised and supported this effort, based on research conducted in 2015-16 by the University of California Berkeley's Labor Occupational Health Program and West Virginia University's Injury Control Research Center. Other supporters include the Association for Career and Technical Education, the Association for Skilled and Technical Sciences, and the National Council for Workforce Education. Funding came from the National Institute for Occupational Safety and Health (NIOSH), through CPWR - The Center for Construction Research and Training.
