

## SENIOR CONSULTANT - RENEWABLE ENERGY PROJECTS

---

Are you passionate about delivering complex projects whilst addressing the growing energy needs in Norway and around the world?

Hustad & Granaas, a fast-growing and dynamic project development consultancy within oil and gas and renewables and are looking for new team members based in Oslo or Stavanger. Given our strong global ambitions and portfolio of projects worldwide, occasional travel to the site may be required.

## POSITION DESCRIPTION

---

This position requires a demonstrable and holistic understanding of all the stages of project development within the renewables industry and preferably within wind. This position also requires demonstrable skills and experience of manage multi-disciplinary team activities and leadership responsibilities for a variety of developers and their respective contractors.

The successful candidate should be able to demonstrate comprehension of technical challenges and ability to simplify complex engineering and business issues.

To deliver on our ambitions of sustained growth we are continuously building our internal programme of products, sales, and marketing materials. We therefore seek a candidate who brings a strong entrepreneurial spirit and who is motivated to help us to transform from consultancy into top-tier renewables energy project developer. Hence, we will give a strong preference to the candidates who have participated in the initiation phase of renewable project development (obtaining concessions, developing PPAs, raising funds etc.)

## EXPERIENCE AND SKILLS

---

- 7+ years of proven and relevant experience within renewable energy projects with preference for the wind industry
- Proven abilities and experience with business development, managing technical professionals with diverse expertise, and client relationship management
- Proven track record of creative problem-solving and the ability to distil and communicate complex challenges into easy to implement solutions
- Proven communication and interpersonal skills necessary for community building internally, and trust building externally
- Proven abilities to represent company at business development and professional sales and networking events to build brand and new customer business bases in this market area
- Management and technical experience directing and preparing power project licensing documents and supporting environmental technical studies

- Experience with grid operators, offtakers, regulatory bodies, investors, and/or commercial project developers is preferred

## QUALIFICATIONS

---

- Master's Degree in related technical or business discipline with demonstrated subject matter expertise
- 7+ years of proven and relevant experience within oil & gas and/or renewable energy projects

## BENEFITS

---

- A modern office facility with a lot of perks located in the centre of Oslo or Stavanger
- Generous pension scheme, health, and travel insurance
- Possibility of receiving bonus and/or equity package based on the performance and growth of the company

## APPLY

---
