Small Displays - Desk bowls - Table Top Planters

Check Soil / Water Level Indicator first to see if growth medium is already saturated. If already saturated DO NOT WATER. Start watering when signs of dryness appear.

If growth medium / water level indicator is dry/low water once every 14 days with approximately 0.5 liters of mildly warm tap water.

Medium Displays - Table Top Troughs - Small Freestanding Floor Plants

Check Soil / Water Level Indicator first to see if growth medium is already saturated. If already saturated DO NOT WATER. Start watering when signs of dryness appear.

If growth medium / water level indicator is dry/low water once every 14 days with approximately 1 liters of mildly warm tap water.

Large Displays - Barrier Troughs - Large Freestanding Floor Plants - Multi Plant Displays

Check Soil / Water Level Indicator first to see if growth medium is already saturated. If already saturated DO NOT WATER. Start watering when signs of dryness appear.

If growth medium / water level indicator is dry/low water once every 14 days with approximately 2 liters of mildly warm tap water.

These guidelines do not cover.

- Feeding
- Pruning
- Fertilising
- Rotation
- Pest and Disease
- Leaf Shine
- Trimming
- Cleaning

Please check with Funky Yukka when your last maintenance visit was recorded. Please base the 14 day watering cycle from this date. i.e displays watered on 1st March will need maintaining next on 14th March.

This is a rapidly developing situation and we will act on and reinforce official government and medical guidance where appropriate.

Thank you.

All the team at Funky Yukka.
