The RSM Psychology Staff

Our dedicated staff specializes in comprehensive psychological and neuropsychological services for school-age children through older adults.

We believe in a treatment approach which is direct, problem-oriented, and solution-focused, for individuals and families.

We work with those who are coping with depression, anxiety, post-traumatic stress, panic, phobia, family and marital conflict, and adjustment to life changes.

We are internationally recognized for our expertise in assessment of learning disorders, attention deficit disorder, concussion, brain trauma, and dementia.

We are educators and researchers who are committed to important public health issues, such as youth violence, concussion in athletes, and care of our wounded military members.

RSM Psychology Center, LLC is directed by Rosemarie Scolaro Moser, PhD, ABN, ABPP-RP (NJ Psychology License # SI02148), who is a board certified neuropsychologist and rehabilitation psychologist.
