Monitor your home and garden with the new Easy Pro View Outdoor HD IP Camera

After the successful launch of the EM6250, EM6270 and EM6250HD Easy Pro View IP Cameras, Eminent comes now with the new model of this line, the EM6260 Easy Pro View Outdoor HD IP Camera.

The EM6260 is suitable for outdoor use (IP66) and controlled directly from your computer, tablet and smartphone thanks to the dedicated and free Easy Pro View mobile application.

Easy installation.

The EM6260 Outdoor HD IP Camera can be easily installed in only three steps. Connect the camera to your network, download the free mobile application and login with your ID and password. The P2P technology allows you to access the camera from your computer, tablet or smartphone whenever you want and wherever you are. Power and Internet connection are managed by a unique cable, which makes installation not only simple but also less invasive. You will only need to drill one single and small hole in the wall. The integrated cable is so thin it can fit perfectly in a PVC tube.

For outdoor use

Thanks to its waterproof housing (IP66), the EM6260 can be exposed to all weather conditions such as rain, sun and high (+50 °C) or low temperatures (-30 °C). Its resistance and compactness (70x70x234 mm) are two of the main reasons for which this camera is ideal both for indoor and outdoor application.

HD sensors and dual lens technology for perfect images

The two separate lenses and the HD sensors ensure always clear picture both day and night. The camera switches automatically or with a self-made schedule between the day and night sensors.

Always up-to-date with the push notifications, microphone and pre-recording

When an event occurs, you receive a real time notification on your tablet or smartphone. Accessing the Easy Pro View app you can watch in streaming what is happening live, watch the registration recorded during the alarm and also the registration of 5 seconds before the triggering of the alarm. Recorded and streamed videos include not only images but also sounds and tones captured by the built-in microphone.

ABOUT EMINENT AND EWENT

EMINENT was founded in 2005 and has as primary aim the development of innovative solutions easy to install and use. In 2012 they added a new brand, **EWENT**, specialized in consumer accessories for tablet, smartphone and computer. The two brands provide together a unique service inclusive of telephonic helpdesks for the final user, 5 years guarantee, manuals and multilingual software.
