

Mobvoi continues to redefine the wearable and smart home space

Leading Chinese AI Company proves eastern companies can still impress

Fairmont Hotel, Monaco – February 6th, 2018 – [Mobvoi](#), China's leading artificial intelligence (AI) company, today, showcases their portfolio of recent launch successes at DISTREE EMEA, at booth D2.

Products available to try include the TicHome Mini, Ticwatch S and Ticwatch E, with the Ticwatches being the sleeper hit of 2017 on Kickstarter, amassing over \$3.2m for their Android Wear powered devices

Mobvoi represents a new wave of Chinese tech companies pushing the industry forward, with their innovative AI products resulting in strong sales and global recognition. Mobvoi have sold over 600,000 products since mid-2016 globally, partially due to building vocal and passionate communities, and achieved by maintaining strong communications post-crowdfunding.

Zhifei Li, the CEO and cofounder of Mobvoi explains: "2017 was an exciting year for us with the success of the Ticwatch S & E and the TicHome Mini launches. We're proud to show them off here, especially to those who've yet to see them first-hand because the process of converting believers in what we're doing is exciting, inspiring and vital to our future success."

Some of the key hardware that will be shown at DISTREE EMEA 2018:

- **TicHome Mini** – Launched along with the Google Assistant push into the smart home speaker market, TicHome Mini is the only portable and splash-proof Google Assistant currently available anywhere
- **Ticwatch S & E** – This pair of critically acclaimed Android Wear smartwatches boast a 2017 iF Design Award for Ticwatch S and a 2016 Good Design Award for Ticwatch E. Stay connected, get fit and look good at the same time
- **Ticwatch 2** – This smartwatch runs Mobvoi's proprietary Tic Wear operating system that comes with its own suite of health and fitness apps

Mobvoi has seen tremendous growth since they started in 2015 as evidenced by growing sales numbers to 37 countries, and attracting collaborations with both Google and Volkswagen.

Mobvoi can be found at booth D2 of the exhibition area.

About Mobvoi

Mobvoi is an AI tech company with in-house core technologies in the areas of speech recognition, natural language processing, vertical search, etc. The company has announced six rounds of financing, led by Sequoia, Zhenfund, SIG, Google, and Volkswagen China Group. In 2015, Mobvoi formed a strategic partnership with Google Android Wear followed by a joint venture with automobile giant Volkswagen in 2017.

Mobvoi has accumulated a wealth of experience in developing AI-powered smart products in wearables, auto and home, that aim to pioneer a new generation of devices that push the boundaries of human technology interactions and capabilities. Its products have received critical acclaim globally through two successful Kickstarter campaigns, each raising over 2.5 million USD.
