

Ensuring a smooth Digital Experience

"Cadyce" a pioneer in hardware solutions and networking technology, announces the availability of their finest USB-C™ accessories. After making waves on the global stage with its premium range of MFI certified Apple accessories and computer peripherals, the IT giant is strengthening its presence at the grassroots level across remote regions too.

USB-C™ is the technology of the future and will be used widely to simplify your life. By using a single type of USB-C™ connector, a wide range of devices can be connected such as VGA, Ethernet, HDMI and older versions of USB.

All new USB-C™ port is half the width and one-third the height of a standard USB connector and only slightly larger than Apple's Lightning or the micro-USB connectors. A USB-C™ port measures just 8.4mm by 2.6mm only.

USB-C™ will soon be the new standard connector for both charging and data transfer. Last year, USB-C™ appeared as a port on a handful of systems, including the Apple MacBook (12" Retina), MacBook Pro 13" and 15" and Google's new Chromebook Pixel. But now, we see a lot of phones and laptops that use the USB-C™ ports. With USB-C™ onboard, you can copy files at USB 3.1 speeds i.e. up to 10 gigabits per second and deliver enough power to charge a laptop, smart phone or tablets.

Cadyce has launched new models in USB-C™ accessories including Multiport Adapters and a Hubs for USB-C™ enabled gadgets. These adapters/ Cables /converters help user to get friendlier with their USB-C™ devices.

Multiport Adapters and Hubs:

- 1) CA-CVM – USB-C™ VGA Multi-Port Adapter
- 2) CA-CHM – USB-C™ HDMI Multi-Port Adapter
- 3) CA-C3HE – USB-C™ to 3 Port USB 3.0 Hub with Gigabit Ethernet Adapter
- 4) CA-C4H – USB-C™ to USB 3.0 4 Port Hub

Here are some common features of Cadyce USB-C™ accessories.

Elegant Look – Cadyce's new accessories have been upgraded by using Premium Aluminium housing which provides a elegant look to all the products.

Reversible – Unlike older USB cable, it doesn't matter which side is up, with a USB-C™ plug, you can insert it either way.

Fast Data Transfer – USB-C™ ports can transfer data using the blazing speeds of the latest version of the USB protocol – up to 10 gigabits per second.

Powerful – The new connector can provide up to 100 watts of power, enough to power a laptop. **Incredible Flexibility** – Via adapters, users will be able to connect older devices to USB-C™ ports, even devices that use non-USB technologies, like Display Port, VGA and Ethernet.

Plug and Play – Cadyce USB-C™ products do not need any drivers to be installed and just plug and play.

About Cadyce – Cadyce is a leading networking and lifestyle brand having a presence all across the globe. Cadyce seeks to be the most preferred brand in the computing and digital lifestyle marketplace. Cadyce dominated the world networking market, due to its deep portfolio of hardware partners, extensive distribution channels, and a wide range of products. Also maintaining pricing to a competitive level, attracting more operator subsidies and enlarging its retail presence has got them closer to the numbers they envisioned.
