AUSTRALIAN CYBER SECURITY REPORT

THE CYBER ATTACK ON PARLIAMENTARY & DEFENCE SERVERS
ON 7 FEBRUARY 2019

Prepared for:

ACSC
AUSTRALIAN CYBER SECURITY CENTRE

**AUSTRALIAN
DEFENCE FORCE**

Australian Government
Australian Signals Directorate

This operation was conducted to ensure greater
Australian national security, for the purposes of ensuring the rule of law &
true equity in domestic & international jurisdictions for all Australian Citizens.

WWW.CONTACTZERO.ORG 

ATTENTION GENERALS & OFFICIAL PERSONNEL

declassified

On Thursday 7 February you became aware of an anomalous & sensitive data exchange from a (non-secured) email address outside of your Parliamentary & Defence network server system. Sensitive information about the relationships of Prime Minister Scott Morrison was also leaked into these communications, creating the impression that despite the non-secured/non-verified email address, that the information leak was an internal one, or a potential State-Actor who had gained forced entry to Parliaments servers. This miscalculation & gross mistake on the part of some members of the Australian Defence Force was the ignition point for what would follow.

Further to this, in the early morning of the 8th of February media outlets reported that Director General Mike Burgess of the Australian Signals Directorate (ASD) & Head of the Australian Cyber Security Centre Alastair MacGibbon took action to brief Australian Parliament on what they believed at the time was a data breach to the Prime Minister & Cabinet's email servers. This led to a server-wide reset for all users passwords, this included the password for the Prime Minister of Australia Scott Morrison.

The good news is, it wasn't China

In the following documentation, exactly what happened will be explained in full detail. The origin of the so called "cyber attack or hack" will be made expressly clear. Also the vulnerabilities of your network, your users & the ongoing blind spot which enabled the attack in the first place will be highlighted & outlined.

I have provided legal documentation in the form of a Queensland Statutory Declaration under the Oaths Act 1867 as witnessed by Justice of the Peace Mr Donald Carey Scott JP QUA L & sealed with the stamp granted authority by the Department of Justice & Attorney General. This cyber report is an addendum to the statutory declaration & is thus tabled publicly for the legal record.

Should the Australian Department of Defence & connected Officers wish to dispute this truthful declaration, you will have to do so in a Federal Court of Australian law. My office & jurisdiction welcomes the opportunity to bring further evidence to the facts that are summarised here for your careful review, consideration & action.

At the heart of the matter is the sensitive intelligence being covered up illegally by your Government. This illegal cover up is the reason I was compelled to take evasive action in an attempt to break the deadlock surrounding this data; by launching the sophisticated phishing attack on your servers on 7 February 2019.

Fortunately for the Australian people & the national security interests of Australia, in this case, I am a friendly actor, contributing to a solution as required by my duties under law, both common & statutory.

Given your proven vulnerability to a simple phishing attack backed by the field work of one man, I would suggest you would do well to heed this report. Australia does indeed have enemies & they have far more resources than I do, fundamentally proving resources are not King in battle, strategy remains supreme. In order to force your corruption to heel, an elaborate 10 year phishing strategy ensued, one FVEY has now bitten hook, line & sinker.

For the Protection & Empowerment of the Australian People.

ELIAHI PRIEST
WWW.CONTACTZERO.ORG

Statutory Declaration

QUEENSLAND
TO WIT

I, Peter Alexander Richard Priest alias Eliahi Priest

of ADDRESS REDACTED IN DIGITAL VERSION in the State of Queensland

do solemnly and sincerely declare that

Being of sound & compos mentis mind & in order to highlight the vulnerabilities & known flaws in Australian national security, flaws which can & will be substantiated with fact, evidence & law; I hereby declare that;

On Feb 7 2019, on the Tails O/S & Tor network from an end point server in Switzerland, I performed a sophisticated phishing attack on the internal email systems of the:

Australian: Department of Defence -	cameron.heath@defence.gov.au
Signals Directorate - FVEY AU	mike.burgess@defence.gov.au
Secret Intelligence Service -	asis@asis.gov.au
Inspector General for Intelligence & Security -	info@igis.gov.au
Parliamentary Servers, PM Scott Morrison -	pmc.gov.au & Mr T.S
Cyber Security Centre	alastair.macgibbon@defence.gov.au

By penalty of perjury, I give my solemn oath to the Crown of the Commonwealth that this information is true & correct, knowing that I am, in good conscience prepared for the consequences of my actions & prepared to accept responsibility for these actions under both Australian Commonwealth law & International law.

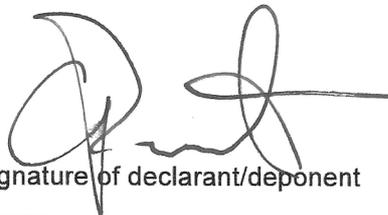

This attack was not intended to be malicious by any means, rather, a call to global accountability under the rule of law, via the data/evidence that was leaked into the network to the former recipients listed by the source.gov account @protonmail.com of which I am the sole owner.

By the truth of this Statutory Declaration, I present the accompanied cyber security report to the relevant justices & jurisdictions for their careful review, consideration & urgent action.

My office, Contact Zero due to its service on behalf all of Nation States in the pursuit of global stability & peaceful economic progress, hereby invokes all privileges under the Vienna Convention 23 May 1969.

There but for the grace of God, go I.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of the Oaths Act 1867.

x 
Signature of declarant/deponent

Taken and declared before me at Cooroy

this 14TH day of FEBRUARY 2019

DONALD CAREY SCOTT JP QUA L

A Justice of the
Peace/Commissioner for
Declarations.

THE PHISHING ATTACK

SOURCE.GOV@PROTONMAIL.COM

7.2.2019

T

<https://edition.cnn.com/2019/02/07/australia/australia-parliament-hack-intl/index.html>

A phishing attack as defined by Wikipedia is,

"is the fraudulent attempt to obtain sensitive information such as usernames, passwords and credit card details by disguising as a trustworthy entity in an electronic communication."

In the case of the February 7 attack source.gov was the disguised trustworthy entity, despite the fact that on the surface it contained no trustworthy credentials; by the careful use of linguistics, inside intelligence (through copious fieldwork) & a three year long process of decompartmentalising agency departments, it was clear to me that the source email would be assumed by the targets as either:

A: An internal national security whistle-blower close to Prime Minister Morrison, potentially within the Prime Minister & Cabinet Office.

B: A State actor (like China or Russia) who had forced entry to personal Australian parliamentary email data in order to have access to the type of secured & security cleared information that I gained in the field.

"One of the Australian Government's key strengths was compartmentalization of its information and its agencies. However, this compartmentalization was also its "Achilles Heal" in the attack and thus its greatest weakness to exploit".

THE PHISHING ATTACK EXPLAINED

SCIENTIFIC PROCESS

System	
Manufacturer:	TOSHIBA
Model:	Notebook
Processor:	Intel(R) Core(TM) i7-2630QM CPU @ 2.00GHz 2.00 GHz
Installed memory (RAM):	8.00 GB
System type:	64-bit Operating System, x64-based processor

Hardware utilised

AIM:

To remove communication barriers (security clearance boundaries) between Department of Defence Senior Officers, Secret Intelligence Service personnel & Parliamentarians. To use a process of force majeure on the Five Eyes spying network (FVEY) to compel its varied jurisdictions to communicate & share "the data" with each variable partner agency, data that I place in the network - thus perform an inception like strategy on the narrative at the highest levels of State & International Power.

To spark a national security leak within Australia around the Nugan Hand Bank, CIA Cocaine & collateral accounts - and force discussion in the 2009 - Federal Reserve Bank to RBS Global SWIFTS.

Don't hack the system, hack the operator of the system.

METHOD:

Create the Phantom.

Prepare security: Boot the Tale's Operating System & log onto the Tor Network - <https://tails.boum.org/>

Create encrypted Protonmail account: source.gov@protonmail.com

Secure contact details for the Primary Targets of the Phishing Attack: <https://www.directory.gov.au/>

Impersonate a National Security Advisor working at the Department of Prime Minister & Cabinet office closely with Prime Minister Scott Morrison.

Refer to myself <Priest> in the third person, create a sense of urgency - attach the key InsigniaGate documents, "the data" - speak as if the security breach has already occurred & "the data" is leaking to the Press.

Use personal knowledge I gained in the field about Prime Minister Morrison's friendship circles, close media contacts & anything else required to convince/dupe Australian Signals Directorate Director General Burgess & Australian Cyber Security, Centre Chief Alastair MacGibbon that I am an official source using an unofficial means to protect the Phantom's identity and job.

Blind Carbon Copy (BCC) Director General Burgess & Alastair MacGibbon in the same email (but refer to them both in the body of the email), this of course will force a <high level> conversation between them to confirm whether the other has received the same email - attach "the data" to that email.

Knowing the above conversation will happen, report knowledge of that conversation to the Australian Secret Intelligence Service <ASIS> & the Inspector General of Intelligence & Security <IGIS>

This will force an inter-agency discussion across usually inaccessible lines of authority and communication. Thus decompartmentalising Australian national security around "the data".

Target known psychological vulnerabilities of executive style personality types, narcissism, elitism & ego.

RESULT:

The attack went perfectly to plan, just over 12 hours later, both targets Mike Burgess & Alastair MacGibbon were called to Parliament House.

"The Data" <The crime - Former President George H.W Bush trafficking Cocaine as a member of the 5 Star Trust ((See Data Below))> can no longer be contained/hidden from the Mainstream Press & thus the Australian Public. News of the attack reached most all world media outlets including CNN & New York Times.

The head of Australian Cyber Security Centre, Alastair MacGibbon, and Australian Signals Directorate director-general Mike Burgess were called to Parliament House yesterday after MPs were warned parliament's systems were the subject of a cyber security - "incident".

Director General,
cc Cyber Unit

Apologies at the outset for the encryption, Morrison has ordered a lid on this due to the personal proximity of his family & the clear potential nightmare PR issues just before election, which may cause yet another spill & I'm certainly not about to risk my job over this.

Having been in meetings with Morrison today & yesterday regarding the fallout of attached, we have word that both London & the US are eavesdropping on all Priest's communications, as Priest also sent this to Vauxhall & through one of his foreign business associates who has access to SIS Chief Mr Alex Younger. Priest was being monitored by them heavily in 2009 when he dated A. Cross one of their field agents (We were told this in Redbook).

I have word that Morrison has already had a preliminary strategy meeting with Hockey in the event that we have to shore up relations with the US over this, however, it's a double bind in the event that Priest manages to make this public. The information attached came to us through a Mr Erik Jensen, Editor in Chief at the Saturday Paper.

Please seek consultation with our partners in FVEY and see if we can get any urgent assistance with this above Morrison's clearance, he's not getting that this is bigger than he & his election & could actually blow out diplomatically in a global way.

Priest can prove IGIS & Stone sat on their arse and did nothing, if Jensen decides to publish this we'll all be the laughing stock.

Please move, thank you.

TS

FVEY just put word out to the Australian Signals Directorate & Cyber Command to have them monitor Priest.

I can also confirm that Morrison has secretly spoken to Hockey about the fallout and both appear unwilling to act.

The DCI Stateside & Younger at VX are being briefed as Priest appears to have finally forced a tipping point on all this.

The difficulty is, I agree with Priest, but I'm not prepared to lose my job over it, I think we all feel the same way.

I'm told BGLU at ASIO have compiled a brief on Priest as he has them on record in one of his evidence files thanking him for his information.

This is far from ideal ?

There is discussion that we should just have Priest removed ???

Margaret,
RE: Redbook

We've not met personally, but I know of your work.

I have it on direct advice that Morrison attempted to reach Trump on this for direction yesterday, however he was unsuccessful due to the State of the Union address.

Myself and one other of Morrison's national security advisors workshopped this with him for an hour yesterday. It was his decision not to leak this to other Ministers or seek advice from your office. He is aware that Porter's office & ASIO have also tried to handle Mr Priest's crusade without success.

It would appear that just ignoring him has only emboldened him further, I've also got pressure from VX in London.

I am sending this to you as Priest references your name in the precis that he has passed to Erik Jensen, Chief Editor at the Saturday Paper.

It is clear Priest intends to stay within the law on this, so we can't even find anything to make an example out of him with. Its on us, or rather Scott to fix it.

It was my advice that we require a soft approach to disclosure, but Scott is over his head due to his exposure through the Stewart family and his personal and emotional stake with his wife Jen & her best friend Lynelle. Priest has photo's of himself & Lynelle's husband Tim at their house in Sydney smoking marajuanna. Its a bad look for the Government all round.

I'd come out publically myself, but there is too much to lose for all of us, so for now this email will be my only means of contact to yourself & others.

It appears Priest's larger evidence folder holds your email responses and IP receipts from Canberra from several years ago. All our inaction appears to have caused this to reach a tipping point where its getting unmanageable.

We're all involved in this cover up without meaning to be & people will go down for it, unless we can find a way to lay this firmly at the United States' feet without overwhelming political fallout & damaging relations? I mean that is what we're being paid to do isn't it?

I advised Morrison to consult Ambassador Hockey today, he is waiting to get an encrypted line..

If you do attempt to reach the Prime Minister do it only via encryption.

MPs demand answers after cyber attack

Federal MPs have called for top bureaucrats to be hauled before the parliamentary intelligence and security committee amid concerns foreign hackers may have breached the IT systems of politicians.

Labor MP Anthony Byrne, the deputy chair of the parliamentary joint committee on intelligence and security, has demanded an explanation from the heads of the Department of Parliamentary Services and the Australian Signals Directorate after the parliamentary systems came under attack yesterday, forcing all MPs to change passwords.

Helen,
re: National Security

Three days ago I met with Morrison over this & since then this is reaching a tipping point due to the proximity of Morrison's family friends to Priest's narrative.

The Director General of Australian Signals Directorate Burgess & his colleagues in Cyber Command under MacGibbon have put a trace on Priest's communications as a result of our friends in Vauxhall & Washington pressuring us to do something about him through FVEY.

I can also confirm Scott has spoken to Hockey about the very real potential of strain to Australian & US relations due to the scale of the crimes referenced by Priest in his evidence, also see attached, provided to us by Eric Jensen, Chief Editor of The Saturday Paper.

Our concern is that Priest has collected a response from your office along with several hundred IP fingerprints that he claims, prove your office was treating his evidence "very seriously". Yet Porter, nor anyone else has come forward officially & this looks very bad to the Australian public, especially before election.

Meanwhile the ASD & Cyber unit are running a smoke screen on this operation.

<https://www.smh.com.au/politics/federal/federal-mps-computer-network-hacked-forcing-passwords-to-be-changed-20190208-p50wgm.html>

Suggest you consult Porter immediately & have BGLU at ASIO brief him on how to advise Morrison about steps forward. Should Trump get involved, we at least want to show that we've been proactive, considering we've had years to respond. This is so bad.

THE UNTOLD STORY OF OFF-BALANCE BANK FRAUD IN AUSTRALIA & THE COLD CASE OF NUGAN HAND BANK

E. Priest, 5 February 2019.

*Dedicated to the life & memory of Gary Web, Father, journalist & an American hero.
His courage cost him his life, may his legacy live in the words that follow.*

The first time I spoke to the current principle of the Five Star Trust, Mr. Marion Horn was in the late August of 2015, I was staying at Pier One under Sydney's iconic Harbour Bridge. It was the perfect opportunity to take the risk which ended up placing me at the heart of one of the most important organised crime investigations of the last century.

Journalist Gary Webb first exposed CIA cocaine & narcotic trafficking in his ground-breaking work, Dark Alliance, the CIA, the Contras, and the Crack Cocaine Explosion. Tragically Gary was found dead with two bullets to the head on December 10, 2004, they called it suicide. Gary's life is immortalized in the 2014 movie "Kill the Messenger".

Knowing the dangers, I took all the important precautions; I bought a prepaid VISA card with cash (Not under my own name) and I made sure I was on a Virtual Private Network (VPN) in Holland on the Pier One broadband in my Hotel room in Sydney when I loaded the credit onto a dummy skype account, just created for this one phone call to Marion Horn's mobile phone.

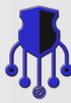

As the phone began to ring, I took a deep breath & as my focus became more acute; in a thick Kentucky accent Mr. Horn answered the phone. I informed him my name was X and I was investigating the CIA's Five Star Trust & its core objective of narcotic trafficking to finance itself outside of requiring Congressional approval for further operational funds. I was quite surprised when Horn began to speak candidly to me & lay out a short backstory.

I remember him vividly telling me, "X people fall in front of busses every day"; I assured him that I didn't catch the bus, preferring trains, so the likelihood was slim. To this came a chuckle in response.

In the years that followed I would infiltrate the Five Star Trust & become one of Horns trusted advisors, collecting considerable intelligence in the process. I would grow to like Horn who, given his history as an asset for the CIA's blackest projects appeared to be a genuinely well-meaning and decent human being.

He nicknamed me "Rambo" and I was assigned to tasks of due diligence on potential partners for the trust as they sort to access the liquid capital of their old accounts, this enabled me to be privy to much of the trusts communications. You may be asking how an ordinary Aussie bloke achieved such an extraordinary position. Please allow me to attempt a summary as concisely as possible without missing any of the important & key details.

Based off the Federal Bureau of Investigation's Top Secret memo to then Senator Edward Kennedy on

July 7, 1989, I can firmly conclude that the Five Star Trust was the Central Intelligence Agencies financial instrument conducting an International drug operation at the highest levels from 1966 – 1976 & codenamed Eagle 2 – just three years prior to the end of the Eagle 2 operation, the Nugan Hand Merchant Bank was established in Sydney Australia. - 1

This crucial FBI memo not only confirms hero journalist Gary Web's findings about CIA drug trafficking, which the CIA later spun and watered down, but actually names the senior US establishment figures who created the Eagle 2 operation. These five men, General Edward Lansdale, who ran the CIA activities in Vietnam; former CIA Director William Colby, who was put in total command of the operation; Former President George H.W. Bush recently deceased last November, who had his top aid, former US Deputy Secretary of State Richard Armitage & General Robert Ferrera aka Laurin William Rossier. There were five men, one star for each man, Five Star Trust, "The Five".

The facts show that at least two of these men, General Lansdale & Director Colby had direct ties to Sydney's Nugan Hand Bank. In fact when one of the banks founders & principals Frank Nugan was found dead on an isolated dirt track in highly suspicious circumstances, his legal council, CIA Director Colby's business card was found in his jacket pocket.

One must ask the obvious question of what an obscure Australian banker was doing with a former Director of the Central Intelligence Agency as a legal council.

On Nugan's death, the Nugan Hand Bank was subsequently accused of corruption & money laundering tied to the CIA's Eagle 2 cocaine & heroin trafficking operation. However at this time, no details of the FBI's memo on Eagle II had been released. After Frank Nugan's suspicious death (ruled a suicide with multiple other footprints around the crime scene before police arrived) & his banking partner, Michael Hand's disappearance - the subsequent Australian Royal Commission into the Activities of the Nugan Hand Group's final report from Royal Commissioner D.G. Stewart to His Excellency the Governor General Sir Ninian Stephen concluded that,

"There is no evidence to support the allegations involving drugs, arms dealing & CIA involvement."

The Royal Commissions conclusion was made on 28 June 1985, four years & 9 days before the FBI briefing to Senator Edward Kennedy. In the briefing the FBI made it clear to Former Senator Kennedy the sensitive positions of their own agents spying within the CIA Eagle II operation & so were far from ready to make the investigation public or even cooperate with a Foreign Agency back in 1985, this fact more than any highlights the reason that the Australian Federal Police & Australia's Intelligence Agencies, ASIO & ASIS were stonewalled by even the FBI when it came to investigating the banks connections to both Colby & Lansdale & their illegal multi-billion dollar drug racket.

1. <https://mega.nz/#ly2j2TKjOj0KoM1xV9hnohjBQNTQ8q6UwNuj2g6yRcAZstF4HGGAO>

33 years later, at the highest levels of national & international security, there continues to be a ultra-covert war between individuals & nations for control of the financial accounts that were utilised “off the balance books” to launder and retain the CIA’s drug profits, these accounts are now known as the Global Collateral Accounts.

The Global Collateral Accounts are a completely unregulated international black market which is controlled by highly compartmentalized security environments or in banking terminology, Chinese boxes, where border crossing permissions are required to have a conversation room to room or bank to bank. It is through my tracing of the collateral accounts that I was directed to make contact with Lord David James of Blackheath, a Conservative in the UK House of Lords who was nominated for his lordship by Sir John Scarlett, the former chief of the UK Secret Intelligence Service aka Mi6 for Lord James’ service to UK security. Lord James & I became unlikely friends of sorts & worked together very closely for six months in the UK summer & autumn of 2011.

At the peak of our investigation in 2011, I had managed to infiltrate the CIA’s more current trade operation of the Five Star Trust Funds. I have recordings lifted from a CIA encrypted platform that reveal CIA Director Leon Panetta’s team requesting my assistance to have Lord James facilitate a reverse transaction from the Royal Bank of Scotland Global account back to the Federal Reserve off balance section, as the US had reached its debt ceiling. -2

When Lord James & I failed to take direction from the US Government we were subsequently informed that Director Panetta had listed us in breach of protocol 4, I recall my response on the COMS channel that night was,

“Look mate, I don’t give a fuck about Panetta’s protocol 4, I don’t even know what that is, and the only protocol I care about is the one where your illegal funds are used to feed hungry kids”.

I’d clearly lost my patience, as most that have been fortunate or rather unfortunate enough to work with me bore witness to on many occasions.

I subsequently told them all to “fuck off and do one” and I terminated the connection.

The last time I went back on the platform was to remove any traces of information I had left there. During this process I found a recording that had been made between Panetta’s Officer code-named M... & another man. The recording clearly reveals M authorising a hit on an asset code-named “Whitecat” which has been sanctioned by the DCI, and connected to trading the accounts. DCI is an acronym for the Director of Central Intelligence (at the time Leon Panetta). This mistake was clearly very sloppy work by the CIA, especially when they’re being outwitted by a country lad from Gunnedah, New South Wales. - 3

After Lord James front door was broken down by a UK Swat team concerned about the security of his wife, my own personal life with a baby on the way in December 2011 was becoming far too complex, stressed and too difficult to handle such a high level work on little income without official support. I subsequently moved back to Australia for my child to be born here & retired for six years from the investigation.

2- https://mega.nz/#F!CnZRVC4T!CPTbKffO3JfZ_uirPyJugQ

3- https://mega.nz/#lynA3HYAK!bYzS_52qzmXrmsnizTsP_6q_YzwPkuSt5NiSWQSY_rw

The key take away from my six months in 2011 working with Lord James was our prior knowledge of the State visit of President Barack Obama to the UK with Prime Minister David Cameron on 24 May 2011.

CIA Agent Marlon McCall, who was in communication with Lord James had informed us of this State visit weeks before the media announced it, McCall had told us that President Obama was coming to discuss the money currently being held by RBS Global with Prime Minister Cameron. -4

I received an exasperated phone call from Lord James the following morning after Obama & Cameron held their first official & private talks. Lord James told me directly that he had arrived at the House of Lords that morning and had received a message from the then leader of the House of Lords Thomas Strathclyde who requested Lord James' immediate attendance in his offices.

Lord James quickly headed to Strathclyde's office; attending also was the then head of the Parliamentary Ethics Committee.

What follows is my lucid recall of the events of that meeting as reported to me immediately after that meeting over the telephone by Lord James himself.

Immediately Strathclyde cut to the chase.

"Lord James, we must ask you to cease this ridiculous investigation. You are not only embarrassing yourself, you are embarrassing our Government.

These financial matters are nothing more than an Ivory Coast scam, please cease and desist your investigations immediately", Strathclyde ordered.

Lord James, who was nominated for his Lordship because of his incredible track record for the Bank of England & British Intelligence conducting forensic financial investigations into terrorist activities dug in his heels.

"Well, I insist, I will not terminate this investigation, I believe I am onto something & I am going to continue to investigate it", Lord James rebutted.

Baron Strathclyde's voice hardened, *"David, this is an order, cease your investigation immediately; you are interfering in the most sensitive British Security incident since World War 2"*.

The gravity of this statement, it seems, is difficult to comprehend to the ordinary lay person with no experience in security and intelligence matters. However, such a statement by a leader on his first duty after a sitting President & Prime Minister of two of the most powerful countries in the world meet to discuss relations is not to be taken lightly. It further confirms the legitimacy of not only the black ops financial transactions but also the entire corpus of the Eagle 2 investigation begun decades earlier.

I have Lord James recorded, verbally confirming this conversation and admission by Strathclyde, the implications are of course geopolitically gargantuan which brings us back to Nugan Hand & the Australian Government's present day cover up of this evidence. -5

4 - https://mega.nz/#!C2Z1jKbD!hqjWrsPqXupOOI_R649luqqNnnnTrqASens9RdSG9k

5- <https://www.dropbox.com/s/rs15aaf7sbbnzlz/Lord%20James%20on%20StrathClyde%202018.mp3?dl=0>

For the past three years I have attempted to have the Australian Government reconvene the Royal

Commission into Nugan Hand in light of this new evidence. This evidence speaks of foreign interference in Australian affairs which is illegal under our espionage & foreign interference laws particularly in relation to organised crime, drug trafficking and terrorism all of which fall under the Criminal Code Act of 1995. Both Australia & the United States are also signatories on the United Nations International Drug Control Conventions which make trafficking Narcotics illegal, even for the purposes of National Security. -6

Clearly the term national security has become a blanket term for anything Governments are embarrassed by, or for the hiding and cover up of the illegal activities of officials who would use the instruments of Government for their own purposes.

I carry ample evidence of the recent Australian Government cover up from local Police, the Australian Federal Police, ASIO, the Inspector General for Intelligence & Security Margaret Stone and the Attorney General Christian Porter, all of whom have played a game of pass the parcel when it comes to accepting accountability or jurisdiction for this investigation.

In 2018 I infiltrated the Australian Prime Minister Scott Morrison's intimate friendship circles, and befriended Tim Stewart whose wife Lynelle was bridesmaid at Prime Minister Morrisons wedding due to the fact she introduced Mr Morrison to his wife Jen Morrison. Mr & Mrs Stewart and their children attend Kirribilli House regularly to spend time with the Morrisons.

Tim Stuart was highly supportive of this work, he received a hardcopy of the FBI document as a result in December last year he broached the issue in summary with Prime Minister Morrison who assured Mr Stewart that he would look into the matter, I subsequently followed up with a recent letter to the Prime Minister. -7

I can thus confirm that sadly yet another leader of Australia is failing to act on one of the most heinous organised crimes that ever graced Australia's Shores.

As a result I am prepared to expose Mr & Mrs Stewart's close relationship with the Morrison's in order to see Justice done. It is to me, rather insightful the company the Prime Minister & his wife choose to keep & have babysit their children when away on State business- (Family Photo's & text messages to verify these facts are available on request). The personal back stories are newsworthy!

These are good families, but Australia & her Rule of Law mandates that our Prime Minister must take leadership on such critical intelligence.

With Michael Hand's service in Vietnam with both Landsdale & Armitage the real reason for the Vietnam War is becoming clearer, 521 of our Diggers died in Vietnam while both the United States & Australia colluded in a record breaking drug scandal and nobody has been held responsible.

Australian's deserve better, our laws demand it.
