International Year of Global Understanding (**IYGU**), le Conseil International de la Philosophie et des Sciences Humaines (**CIPSH**), UNESCO-MOST & Mémoire de l'Avenir (**MDA**)

Bonjour,

IYGU, CIPSH, WHC, UNESCO-MOST et MDA lancent un **APPEL A PROJET** afin de créer un **mouvement mondial** d'artistes pouvant témoigner de l'impact des Arts dans les sociétés et de l'importance des propositions locales sur un plan global !
(voir Open Call & dossier attaché).

Une sélection exigeante de propositions d'artistes en provenance de chacun des 206 pays membres de l'Organisation des Nations Unies, occasionnera une installation présentée lors de la Conférence Mondiale des Humanités en 2017 à Liège, organisée par IYGU, l'UNESCO, le CIPSH et la Fondation pour la CMH.

Parallèlement, une mise en ligne d'un choix plus ample de propositions a pour ambition de créer un mouvement dynamique de niveau international. L'implication active des artistes permettra un partage immédiat des engagements, des recherches, des savoirs et des connaissances autour du monde.

Pouvons-nous solliciter votre aide, afin de mettre cet appel en lien avec vos réseaux d'artistes ?

Les détails des agendas, de la réception du matériel, etc. sont dans le dossier et l'**OPEN CALL**.

Vous remerciant par avance, Cordialement,
Margalit BERRIET

GLOBAL UNDERSTANDING – A COLLECTIVE INITIATIVE
par Mémoire de l’Avenir et l’IYGU Centre d’Actions Globales pour les Arts

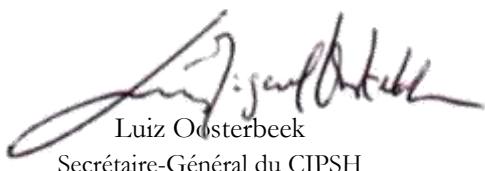

Comprendre comment les dynamiques globales sont désormais intimement connectées aux comportements locaux est un défi urgent pour les humains, dans tous les continents. Un défi lié étroitement à tous les enjeux qui sont considérés dans le cadre des objectifs retenus par les Nations Unies, tels que la pauvreté et la faim, les besoins en énergie et en eau, la qualité de l’éducation et l’équité, ou les changements dans le climat et l’économie.

Ce défi, qui est de plus en plus ressenti de forme dramatique par des sociétés soumises à des situations extrêmes (sécheresses, guerres, inondations, chômage de longue durée, ...) se croise avec le besoin d'utiliser tous les outils que les humains ont su mettre en route, y compris les connaissances scientifiques, des formes traditionnelles d'adaptation à des risques naturels, les réseaux sociaux de dissémination de connaissances et de gouvernance intergénérationnelle, et en particulier la préservation d'une énorme diversité d'approches, de réponses possibles, qui ont construit la résilience des humains sur la base de la préservation des connaissances acquises et de la créativité innovatrice.

Le Conseil International de la Philosophie et des Sciences Humaines (CIPSH) soutient l'initiative de l'Année Internationale de la Compréhension Globale (IYGU), particulièrement son approche qui part des besoins des personnes (se nourrir, habiter, se déplacer, se reposer, etc.) et souligne le besoin d'en profiter pour poursuivre une route de convergence entre les sciences exactes et naturelles, les sciences humaines et les arts, qui respecte la spécificité de chacun mais permette de vraiment construire un cadre global de renversement stratégique, lequel devra cadrer les besoins de court terme avec des visions de moyenne et longue durée, contre toute forme de pensée unique. C'est aussi dans ce sens que se prépare la Conférence Mondiale des Humanités, préparée et organisée avec l'UNESCO et la Fondation pour la CMH.

L'initiative de *Mémoire de l’Avenir* et du *Centre d’Actions Globales pour les Arts* du IYGU, totalement en ligne aussi avec les objectifs définis pour la Conférence Mondiale des Humanités, permet de fédérer des réflexions issues du monde des arts sur les enjeux en discussion. Les arts ne remplacent pas les sciences et ne sont pas réductibles aux préoccupations des sciences, mais elles participent du processus de mise en valeur de la créativité, de l'imagination de nouveaux avenir, de diversité et de pensée critique. Dans ce sens, le CIPSH s'associe à l'appel à projet de *Mémoire de l’Avenir* dans le cadre de l'IYGU et de la préparation de la Conférence Mondiale des Humanités, et s'engage à le disséminer, tout en désirant que les ressources budgétaires nécessaires à son accomplissement soient réunies dans les délais les plus courts.

PROJECT

IYGU - Global Understanding – a collective initiative and a contribution towards the World Conference of the Humanities

--- Mission: Organize a global international movement of artists

--- Question: What is the role of the Arts and Artists in a world facing major changes?

WHAT- The International Year of Global Understanding (IYGU) starts at the premise that all transformations of nature are based on human actions, and all human actions are based on cultural schemes of interpretations. With globalization processes the conditions for human actions have changed dramatically. Dealing successfully with cultural, social, and climate changes on a worldwide level requires people to understand their own locally embedded lives in a global context. Global understanding becomes a new conditio humana, or human condition. It necessitates bridging the gap between local acts and global effects—because thinking globally and acting appropriately on a local level presupposes Global Understanding.

“Knowledge is the factor that leads us to change our way of thinking. However, it is the understanding that leads to change attitudes. Global Understanding puts emphasis on culturally different paths to global sustainability.” Eliezer Batista,¹

Global Understanding helps overcome ignorance or lack of knowledge of the global implications of social, ethical and aesthetical actions. A lack of understanding of the consequences of our actions, between cultures or between people and nature may have a disastrous impact on our future. The conditions of everyone’s lives are changing. Individuals and societies must unite in order to live together in consciousness of one another and of our natural living conditions.

WHO- Each within his/her own reality can make a difference and propose actions or provide solutions. Artists demonstrate and reflect on all questions of societies and evoke encounters between people.

WHY- Today, more than ever, initiatives should favour access to knowledge and universal values, and should seek to connect worldwide problems and solutions. We need to encourage global understanding and enhance participation and collaboration beyond borders on global issues, such as education, humanities, environmental consciousness, natural sciences, ethics and esthetics.

HOW- Arts and Cultures are powerful instances and wonderful mediators in the constitution of social realities and personal mindsets, including learning and dialogue. With the ongoing rise of digital platforms, socio-cultural practices now have, theoretically, a global reach.

Arts and artists are bridging the gap between people, continents, cultures, civilizations, and time. Arts and cultures are a journey in the world of Mankind, beyond political or religious limitations.

Art is an expression and a mirror of the human mind. It progresses, criticizes, proposes, invents, thinks, transforms. It is a record of our pluralities of histories, visible and hidden ones.

¹ Eliezer Batista, key initiator of the 1992 UN Conference on Environment and Development in Rio de Janeiro, Brazil

The Arts allow individuals to development within collective cultures, economies, and conflicts. It is an ideal mediator for dialogues. The arts are connecting the past, the present and the future.

The local, regional and the global, offering original regenerated practices of abstract and utilitarian methods, along to ideas, inventions, practice or aesthetics.

« ...l'histoire de l'art et celle de l'homme sont indissociables ; l'art commence avec l'homme ou même, peut-être, avec son prédecesseur direct l'Australopithèque. Dès son origine, l'homme s'affirme comme un artiste, parce qu'il partage ses premières pulsions d'artistes avec d'autres animaux, notamment peut-être avec certains grands singes, parce que, d'emblée, il collecte et collectionne les « œuvres d'art » de la nature, parce qu'il crée aussitôt des formes, il produit des traces et des tracés et, très tôt, invente les premières parures... » 2

PROPOSAL

A COLLECTIVE OF ARTISTS will illustrate via a general schema of communication, transcending locations or personal differences a better understanding of our realities, our limits, our tools, our objects, our symbols and languages, our philosophies, our choice of living, our histories, our civilization, as well as our choices going towards the future.

Nowhere on Earth are people without languages and without arts.

"Intangible cultural heritage is a living set and a perpetually constant re-creation of practices, knowledge and of representations, that enabling individuals and communities at all levels of society to express ways of seeing the world through systems values and ethical standards."3

Organize a worldwide movement of artists for Global Understanding, as a contribution for the preparatory debate on the World Conference of the Humanities.

The following proposal is written in hierarchy of implication and objectives depending on time, place and budget:

The Arts are an ongoing research on the relations amongst human beings and between human beings and nature.

An artist works out of his/her own experiences and awareness. An artist's responsibility lies not only in the aesthetic appearance of their work but also in their influence, provocation, proposal or reflexive criticism. An artist carries a responsibility to provide people with ways to discover the world, to explore the similarities and differences that exist between them and others.
