

Small Unmanned Aerial Vehicles: Uses for Natural Resource Management Workshop

Wednesday, November 20 from 9:00am-11:30am

Cincinnati Nature Center

Center for Conservation—Dater and Dornette Rooms
4949 Tealtown Road—Milford, OH 45150

Local experts will present on drone technology for natural resource professionals. Drones can provide higher resolution imagery, instant surveys, and an unique perspective to land management. Come learn and see if a drone is right for you, how to get started, and how to use your data.

Representatives from environmental organizations, consulting, and the drone industry will present on the topics below using their experiences and in-depth knowledge.

Topics:

- Practical drone applications
- Drone pilot certification and regulations
- Technology options
- Flight demonstration and pre-flight planning
- Imagery analysis

Registration:

This workshop is meant for landowners, natural resource managers, or conservation organizations that have an interest in using drone technology for land management. Registration is free. RSVP by calling 513-785-6664 or email maurermr@butlercountyohio.org
