RAWFILL kick-off meeting
Liège, 7th June 2017

Interreg
North-West Europe
RAWFILL
European Regional Development Fund
Sustainable development in soil technologies
Landfill construction & rehabilitation
Industrial sites rehabilitation
Soil decontamination
Waste valorisation
Landfill Mining
Geosynthetics
MEASURING SUSTAINABILITY

Multicriteria analysis

Comparing projects, optimising solutions
WASTE VALORISATION

✓ Master Plans
✓ Solutions for collection, sorting, recycling
✓ Industrial Ecology
✓ Refused derived fuels
✓ Landfill mining
✓ Sludges treatment
✓ Biogas collection
✓ Leachate collection
✓ Training (VAL⁺ Academy)

Wastes are resources
LANDFILLS & INDUSTRIAL SITES

Civil Engineering

- Design & construction of controlled landfills
- Biogas valorisation & leachate collection
- Landfill rehabilitation
- Industrial site reconversion
- Landfill Mining solutions
- Soil & groundwater decontamination
CONSTRUCTION & REHABILITATION
CIVIL WORKS EXPERTISE

- Geology, hydrogeology, geotechnics
- Infrastructures
- Geosynthetics: membranes, grids, textiles, synthetic piping...
- Renewable energies
- Optimisation & Cost Killing
  - Technical studies & designs
  - Terms of Reference
  - Contract negociation
  - Works follow-up
  - Independent Third Party
  - Environmental studies & permitting
ENGINEERING GEOLOGY
BUSINESS DEVELOPMENT

Economic Intelligence
Thank you!
