

1ST ADVISORY BOARD

23/10/2017

Partners presentation: **SAS Les Champs Jouault**

Located in Cuves, in Normandy in France.

Since 2009, we exploit a landfill as bioreactors, allowed to treat 75 000 tons of waste per year for 20 years (municipal and industrial waste).

Cuves, Manche

Partners presentation: **SAS Les Champs Jouault**

RAWFILL

Partners presentation: **SAS Les Champs Jouault**

Our role in RAWFILL:

- Collect french information about landfill and landfill minning experiences,
- To make available our site for the tests necessary for site-Pilot n ° 2,

Our interest in RAWFILL:

- Have a better know of landfills potential and consider waste as ressources,
- Redefine the role of the new landfill with landfill minning technical,

Partners presentation: **SAS Les Champs Jouault**

Advisory board expectations :

- Studies carried out before the Landfill Mining realization (Geophysics studies ? Boreholes ? Planification ?),
- Technical talks about landfill minning (about the process, machines, etc.)
- Cost of Landfill Mining operations,
- Type of material or waste extracted,
- Safety measures taken for effluent (Gas & Leachate),
