

Inomize Becomes TSMC Design Center Alliance Partner

Netanya, Israel — April 28, 2015 — Inomize, a leading provider of turnkey ASIC/SoC design services, announced today it has been selected as a TSMC Design Center Alliance (DCA) partner.

Inomize is a leading provider of turnkey ASIC and SoC designs and specializes in managing complex ASIC projects. Inomize's services includes system definition, architecture, algorithm, digital, analog mixed signal, RF, synthesis backend, manufacturing and silicon validation. Inomize's comprehensive expertise in semiconductors covers advanced CPU subsystems, a variety of modems (wireless and wireline), video and imaging.

"TSMC is pleased to welcome Inomize to the DCA program where Inomize can continue to leverage its value-added services, industry presence and design expertise to serve emerging and system companies," said Suk Lee, TSMC Senior Director, Design Infrastructure Marketing Division. "Inomize has successfully taped out to TSMC processes and we look forward to extending the reach of the TSMC DCA service with them."

The TSMC DCA program provides service from specification to working silicon. These services include digital design, RTL-to-GDS implementation, full-chip placement and routing, as well as offering analog mixed signal and RF.

"We are proud to work with TSMC," said Udi Shaked, Inomize Chief Executive Officer. "Our expertise in the latest processes and leadership in low-power design and cutting edge ASICs will help us maintain a solid track record with TSMC customers."

About Inomize

Inomize is a professional Research & Development firm specializing in the design and delivery of hardware solutions. Inomize offers a wide range of services tailored to meet your project needs and product constraints in terms of cost, performance and power consumption.

Inomize successfully delivers ambitious projects on time and on budget. Inomize gets the maximum out of the available technology and, when necessary, pushes it to the limit using the latest advancements to meet the customer's project needs. With years of experience and a proactive project management approach, Inomize reduces development time and minimize risks of complex hardware design projects.

Established in 2007, Inomize is a fast-growing company and the largest ASIC design firm in Israel. Among Inomize's customers are large international corporations and startup companies from Israel, Europe and North America. Find out more about Inomize at www.inomize.com
