Rihal

“

An intelligent & dynamic data extraction and transformation platform for the Energy Sector.

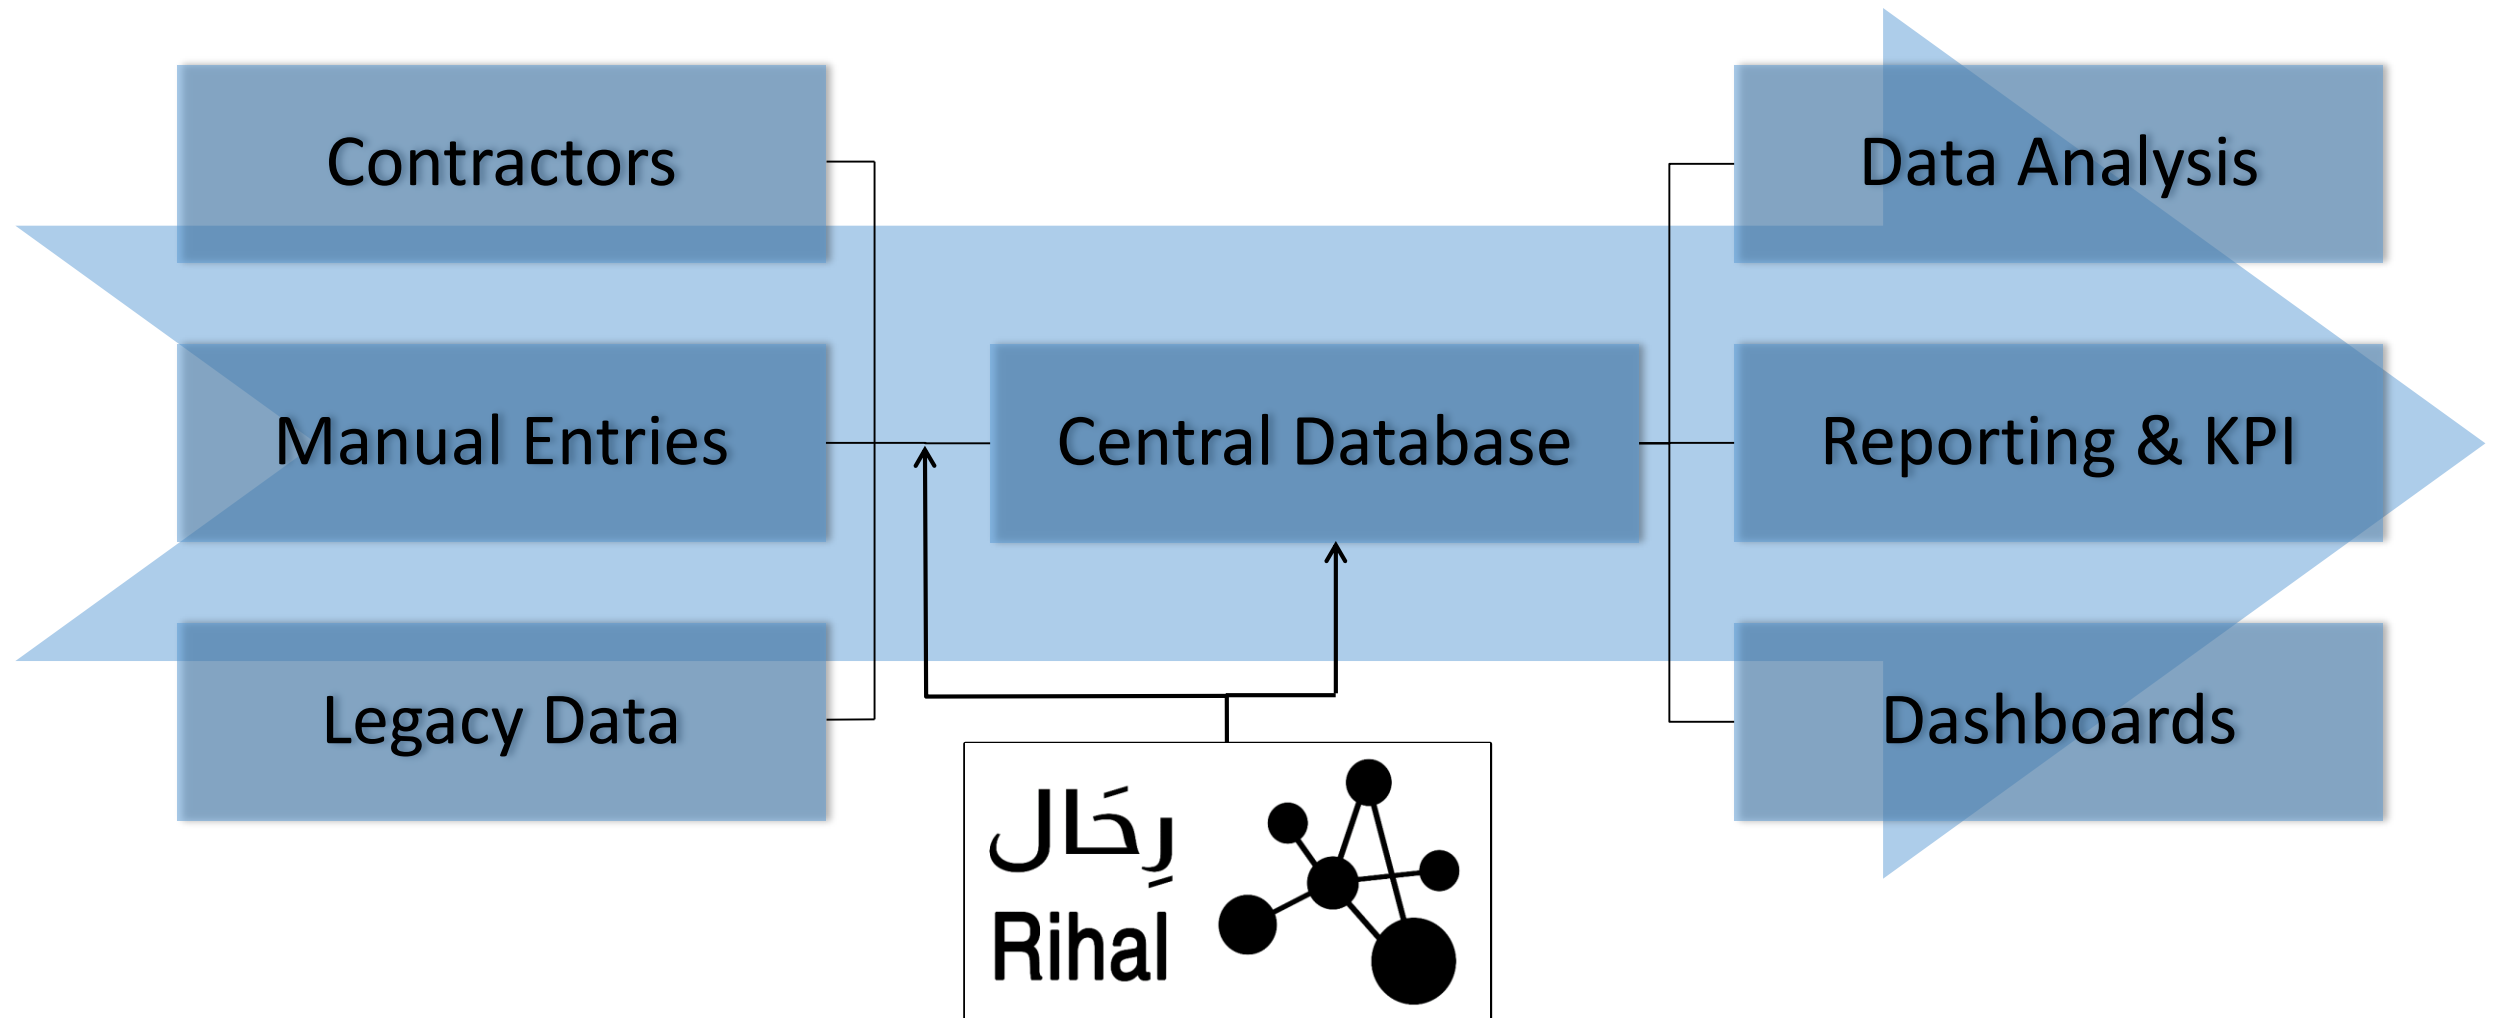

The Challenge

The Energy Sector is a mature market that was established in an era where data control was not a priority. Decades compiling data that are inaccessible, unsorted, unverified and unmanaged.

Utilizing this data is of great benefit to businesses for it to be used as a tool to increase efficiency, productivity and process safety.

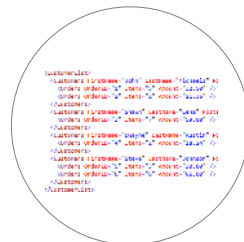

Rihal's Position in the Data Story

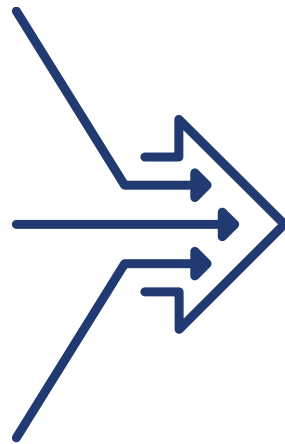

Rihal Platform

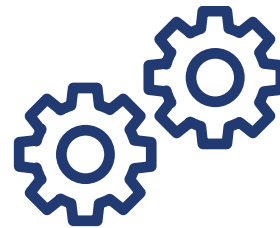

Data Sources

Data Ingestion
