

Smart Roofs Solar is recognized as Connecticut's
PACESetter Award Winner for 2018.

PACEsetters are the individuals and organizations that use C-PACE to accelerate the impact of green energy on our environment, economy and communities. Being a **PACEsetter** means leading by example, being a significant part of the green energy economy, and helping to spark the green energy movement.

The Connecticut Green Bank created the annual **PACEsetter** Awards to acknowledge contractors and other stakeholders who are advancing the green energy movement through C-PACE, and whose leadership establishes a “pace” for others to follow.

Smart Roofs Solar

is excited for the opportunity to apply what we have learned along the way to make your solar energy project a major success!
