County and Interregional Share Estimates

The STIP consists of two broad programs, the regional program funded from 75 percent of new STIP funding and the interregional program funded from 25 percent of new STIP funding. The 75 percent regional program is further subdivided by formula into County Shares. County Shares are available solely for projects nominated by regions in their Regional Transportation Improvement Programs (RTIP). A detailed explanation of this methodology is included in the County Share portion of this document.

The 2018 STIP Fund Estimate (FE) indicates that there is negative program capacity for the Public Transportation Account (PTA). This means that many of the transit projects currently programmed in the STIP will either have to be delivered with State Highway Account funds, federal funds, or be unprogrammed.

The following tables display STIP county and interregional shares and targets for the 2018 STIP.

Table 1. Reconciliation to County and Interregional Shares

This table lists the net changes to program capacity from the 2018 STIP FE to the capacity used in the County and Interregional Shares. This table also separates the program capacity by PTA and State Highway Account capacity. The table is based on Commission actions through June 30, 2017.

Table 2. Summary of Targets and Shares

This table takes into account all county and interregional share balances through the June 2017 Commission meeting, as well as new statewide STIP capacity. For each county and the interregional share, the table identifies the following target amounts:

- <u>Base (Minimum)</u>: This is the formula distribution of new capacity available through the end of the share period 2019-20. This is the first priority for new programming, and it represents the minimum amount that will programmed in each county. The calculation of this target is shown in Table 3.
- <u>Total Target</u>: This target is determined by calculating the STIP formula share of all new capacity through 2022-23. The calculation of this target is shown in Table 4.
- Maximum: This target is determined by estimating the STIP formula share of all available new capacity through the end of the county share period in 2023-24. This represents the maximum amount that the Commission may program in a county, other than advancing future shares, pursuant to Streets and Highways Code Section 188.8(j), to a county with a population of under 1 million. The calculation of this target is shown in Table 5.
- Advance Project Development Element (APDE): This target is determined by calculating the STIP formula share of the estimated capacity to be available for APDE. The calculation target is shown in Table 6.

Table 3. Calculation of New Programming Targets and Shares – Base (Minimum)

This table displays factors in the calculation of the Base (Minimum) Target.

- <u>Net Carryover</u>: These columns display the current share status, including STIP allocations and amendments through the June 2017 Commission meeting. Positive numbers indicate unprogrammed shares, and negative numbers indicate shares that were advanced.
- Net Share (Base): This section calculates the base (minimum). The base (minimum) is the formula distribution of new capacity available through 2019-20 while accounting for existing unprogrammed share balances. The calculated base for each county is the formula distribution of new capacity, not to exceed the unprogrammed share balance. Because the total unprogrammed share balance exceeds the total capacity available through 2019-20, in some instances the base target may be below the unprogrammed share balance.
- <u>Net Advance</u>: Numbers in this column represent advances against future capacity. The advances did not change in the calculation of the base target as only unprogrammed share balances were calculated.

Table 4. Calculation of New Programming Targets and Shares - Total Target

This table displays factors in the calculation of the Total Target.

- <u>Net Carryover</u>: These columns display the current share status, including STIP allocations and amendments through the June 2017 Commission meeting. Positive numbers indicate unprogrammed shares, and negative numbers indicate shares that were advanced.
- <u>2018 STIP Target Through 2022-23</u>: This section calculates the total target. The total target is the formula distribution of new capacity available through 2022-23 adjusted for carryover balances and lapses.
 - o <u>Formula Distribution</u>: This is the 2018 STIP share through 2022-23. It is the formula distribution of program capacity available through 2022-23. The amount distributed is the new capacity less the unprogrammed shares, lapses, and the decrease in advances.
 - Add Back Lapses 2015-16 & 2016-17: This identifies the amount of projects lapsed in 2015-16. These amounts are credited back in the 2018 STIP Fund Estimate to county and interregional shares for the four-year share period beginning 2020-21.
 - Net Share (Total Target): This is the 2018 STIP target through 2022-23. The Net Share (Total Target) is calculated by adding to the formula distribution the lapses and the unprogrammed balance or balance advanced. In cases where the distribution of new capacity is insufficient to cover prior advances (i.e., the Net Share would be less than zero), a zero appears in the Net Share column.
 - Net Advance: Numbers in this column represent advances against future capacity. This occurs when the distribution of new shares (through 2022-23) is insufficient to cover prior advances.

Table 5. Calculation of New Programming Targets and Shares - Maximum

This table calculates the maximum amount that the Commission may program in a county, other than advancing future shares, pursuant to Streets and Highways Code Section 188.8(j), to a county with a population of under 1 million.

- <u>Net Carryover</u>: These columns display the current share status, including STIP allocations and amendments through the June 2017 Commission meeting. Positive numbers indicate unprogrammed shares, and negative numbers indicate shares that were advanced.
- <u>2018 STIP Share Through 2023-24</u>: This section estimates the maximum target. This is the formula distribution of estimated new capacity available through 2023-24 adjusted for carryover balances and lapses.
 - o <u>Formula Distribution</u>: This column estimates the STIP share of the estimated new capacity through the county share period ending in 2023-24. It is the formula distribution of estimated program capacity available through the county share period ending in 2023-24. The amount distributed is the new capacity less the unprogrammed shares, lapses, and the decrease in advances.
 - Add Back Lapses 2015-16 & 2016-17: This identifies the amount of projects lapsed in 2015-16 and 2015-16. These amounts are credited back in the 2018 STIP Fund Estimate to county and interregional shares for the four-year share period beginning 2020-21.
 - Net Share (Maximum): This target is the STIP share of all available new capacity through the end of the county share period in 2023-24. This represents the maximum amount that the Commission may program in a county, other than advancing future shares, pursuant to Streets and Highways Code Section 188.8(j), to a county with a population of under 1 million. The Net Share (Maximum) is calculated by adding to the formula distribution the lapses and the unprogrammed balance or balance advanced. In cases where the distribution of new capacity is insufficient to cover prior advances (i.e., the Net Share would be less than zero), a zero appears in the Net Share column.
 - Net Advance: Numbers in this column represent advances against future capacity. This occurs when the distribution of new shares (through 2022-23) is insufficient to cover prior advances.

Table 6. Calculation of New Programming Targets and Shares - APDE

This table calculates the available amount that can be programmed for STIP APDE, pursuant to Government Code Section 14529.01(c). These shares will be treated as an advance of regular future county or interregional share.

• <u>Formula Distribution</u>: This is the formula distribution of APDE capacity available for the STIP period.

- <u>Net Share (APDE)</u>: The Net Share (APDE) is determined by calculating the STIP formula share of the estimated capacity identified for APDE.
- <u>Net Advance</u>: Numbers in this column represent advances against future capacity. This occurs when the distribution of new shares is insufficient to cover prior advances.

Table 7. Planning, Programming, and Monitoring (PPM) Limitations

State law provides that up to 5% of a county share may be expended for planning, programming, and monitoring (PPM). This limitation is applied separately to each four-year county share period.

- <u>Total</u>: This section identifies the shares for the 2020-21 through 2022-23 share period, based upon the 2016 and 2018 Fund Estimates. These are the amounts against which the 5% is applied.
- <u>5% PPM Limitation</u>: These are the PPM limitations for the 2020-21 through 2022-23 share period.
