

Stockton - Washington Corridor Downtown Transit & Accessibility Project

We want your input!

What: **Community Meeting**

When: **Monday, July 23, 2018, 4:00 pm to 7:30 pm**

Where: **City Hall Council Chambers at 94 N. Washington Street in Sonora**

The public is invited to attend a community meeting for the Stockton--Washington Corridor – Downtown Transit & Accessibility Project. The project seeks to place transit stops on either Stockton Street or S. Washington Street, with additional pedestrian and signal improvements along the streets and at the intersection. Two alternatives will be presented for the project improvements and transit locations. The first alternative is to place transit facilities along Stockton Street west of Green Street and the second alternative is to place transit facilities along S. Washington Street north of Church St. Both alternatives include modification to the existing signal and enhancing pedestrian safety and access through the project area. Design options for the transit shelters will also be presented.

Please join City representatives and project team members to learn about the project and give your feedback on the alternatives and improvement options. The meeting is intended to be an interactive workshop where questions and discussions are highly encouraged, with the end-result of determining which alternative is preferred by the community.

If you are unable to attend and would like to provide input on the preferred transit shelter location and design, meeting materials and information will be available on the City's website www.sonoraca.com and available at City Hall through July 31.
